SCHEDULE OF SUPPLIES/SERVICES

CONTINUATION SHEET

ITEM NO.	SUPPLIES/SERVICES	MAX. QUANTITY	UNIT	UNIT PRICE	AMOUNT
0001	CONTRACT MINIMUM – KICKOFF MEETING AND INITIAL PROGRAM PLANNING The Contractor shall participate in one contract kickoff meeting and perform the associated initial program-planning activities necessary to establish the administrative and management framework for performance of the Tier II Mobile Command Post Vehicle (MCPV) IDIQ contract. The effort shall include preparation for and participation in the kickoff meeting; identification of Contractor points of contact and key personnel; review of contract administration, ordering procedures, communications protocols, invoicing procedures, Government-furnished property/information planning, security coordination, and anticipated First Article planning considerations; and preparation of a concise kickoff action/decision log documenting agreed actions, responsible parties, and due dates. The Firm-Fixed-Price includes all labor, travel, lodging, transportation, materials, and incidental expenses necessary to perform this CLIN. Performance of this CLIN does not authorize the Contractor to begin First Article design engineering, procure First Article materials or equipment, fabricate the MCPV, order a Prime Hauler Vehicle, or otherwise perform work associated with an unfunded delivery order. Such work may begin only when specifically authorized by a funded delivery order issued by the Contracting Officer. PSC: 2330 Line Period of Performance: 09/30/2026 - 09/29/2027 Base Period	1	LT	\$ _____	\$ _____

Clauses By Full Text

B.1 CONTRACT TYPE AND STRUCTURE

The Government contemplates award of a single-award, Firm-Fixed-Price (FFP), Indefinite-Delivery/Indefinite-Quantity (IDIQ) contract for Tier II Mobile Command Post Vehicle (MCPV) systems.

The guaranteed minimum under the IDIQ contract is the \$5,000.00 Firm-Fixed-Price Contract Kickoff and Initial Program Planning effort established under CLIN 0001.

MCPV trailers and integrated mission systems and associated Prime Hauler Vehicles are separately priced CLINs and will be furnished only when specifically ordered through a funded delivery order issued by an authorized Contracting Officer.

For purposes of this contract, a complete Tier II MCPV capability consists of:

1. One Tier II MCPV trailer and integrated mission system; and
2. One compatible Prime Hauler Vehicle, when ordered.

Individual requirements above the guaranteed minimum will be ordered through written delivery orders issued by an authorized Contracting Officer.

B.2 MINIMUM GUARANTEE

The guaranteed minimum under this IDIQ contract is \$5,000.00, which will be satisfied through the Government's order of CLIN 0001 – Contract Minimum – Kickoff Meeting and Initial Program Planning at the time of contract award.

Upon issuance and funding of CLIN 0001, the Government will have satisfied its minimum ordering obligation under the IDIQ contract.

The Government does not guarantee the purchase of any MCPV trailer, First Article, Prime Hauler Vehicle, production quantity, or other supply or service beyond CLIN 0001.

All requirements above the guaranteed minimum are subject to the availability of funds and issuance of a funded delivery order by an authorized Contracting Officer.

The Contractor shall not incur costs or perform work associated with an anticipated First Article, production vehicle, Prime Hauler Vehicle, or other future requirement in advance of a funded delivery order authorizing that work.

That aligns very cleanly with FAR 16.504: the Government is legally committed to a stated minimum and nothing more unless additional orders are placed.

B.3 MAXIMUM CONTRACT VALUE

The maximum aggregate value of all delivery orders issued under this contract, inclusive of the Base Ordering Period and all Option Ordering Periods, shall not exceed **\$15,000,000.00**.

The contract ceiling represents the maximum potential value of the IDIQ and does not constitute a Government commitment to order supplies or services up to that amount.

B.4 MAXIMUM AND EVALUATION QUANTITIES

In addition to the guaranteed minimum established under CLIN 0001, the maximum vehicle quantities available for ordering under this contract are thirteen (13) Tier II MCPV trailers and integrated mission systems, inclusive of one First Article, and thirteen (13) Prime Hauler Vehicles.

The maximum quantities by ordering period are:

Ordering Period	MCPV Trailers	Prime Haulers
First Article	1	1
Base Production	2	2

Ordering Period	MCPV Trailers	Prime Haulers
Option Period 1	3	3
Option Period 2	3	3
Option Period 3	2	2
Option Period 4	2	2
Total Estimated	13	13

These quantities establish the maximum quantities available for ordering and the quantities used for price evaluation. They do not constitute a Government commitment to order those quantities.

The Government's only guaranteed obligation is the \$5,000.00 minimum established under CLIN 0001.

B.5 CONTRACT KICKOFF AND INITIAL PROGRAM PLANNING – CLIN 0001

CLIN 0001 constitutes the Government's guaranteed minimum under the IDIQ contract.

The Contractor shall perform the kickoff and initial program-planning activities described in the CLIN and participate in one kickoff meeting at the location or by the method identified by the Contracting Officer.

The kickoff meeting is intended to establish the administrative, management, communication, ordering, and coordination framework for subsequent contract performance. The meeting may include preliminary discussion of anticipated First Article requirements, Government-furnished property or information, interfaces, schedule considerations, and future Government decisions.

Neither the kickoff meeting nor any discussion occurring during the meeting constitutes authorization to begin First Article design, engineering, procurement, fabrication, integration, testing, or other work not expressly ordered and funded.

The Contractor shall provide a concise action/decision log within five (5) business days after the kickoff meeting identifying actions, responsible parties, and agreed due dates.

The Firm-Fixed-Price for CLIN 0001 is \$5,000.00 and includes all costs associated with performance of this CLIN.

B.6 FIRST ARTICLE MCPV TRAILER – CLIN 0002

CLIN 0002 consists of one complete First Article Tier II MCPV trailer and integrated mission system.

The Contractor's FFP shall include all nonrecurring and recurring costs necessary to design, manufacture, integrate, test, document, deliver, and obtain Government approval of the First Article.

The First Article price shall include, as applicable:

- a. Nonrecurring engineering;
- b. Design finalization;
- c. Prototype and production planning;
- d. Trailer fabrication;
- e. Structural and mechanical systems;

- f. Electrical generation, distribution, energy-storage, and power-management systems;
- g. Heating, ventilation, and air-conditioning systems;
- h. Communications, information technology, radio-frequency, networking, and C4 systems;
- i. Mast and antenna systems;
- j. Interior workstations, furnishings, cabinetry, storage, and mission-support equipment;
- k. Exterior equipment, accessories, and required markings;
- l. Safety and emergency systems;
- m. Software and firmware configuration;
- n. System and subsystem integration;
- o. Configuration management;
- p. Quality assurance and quality control;
- q. Inspection and testing;
- r. First Article testing;
- s. Correction and retesting of Contractor-caused deficiencies;
- t. Technical manuals, drawings, schematics, parts information, test reports, and other required documentation;
- u. Initial operator and maintenance familiarization required by the PWS;
- v. Packaging and preparation for delivery;
- w. Transportation and delivery;
- x. Contractually required warranty coverage; and
- y. All other costs necessary to provide a complete and compliant First Article MCPV trailer and integrated mission system.

The Contractor shall not separately charge the Government for nonrecurring engineering, tooling, design development, integration development, First Article testing, rework, travel, freight, documentation, or other costs necessary to obtain approval of the First Article.

Following written Government approval, the First Article shall establish the production configuration baseline for subsequent MCPV trailers.

B.7 FIRST ARTICLE PRIME HAULER – CLIN 0003

CLIN 0003 consists of one new Prime Hauler Vehicle compatible with and properly configured for the First Article MCPV trailer.

The Contractor shall ensure that the vehicle:

- a. Meets all requirements identified in the PWS;
- b. Has sufficient towing, payload, electrical, braking, hitch, and performance capability for the associated MCPV trailer;
- c. Includes all required manufacturer-installed and Contractor-installed equipment and accessories;
- d. Is fully compatible with required trailer electrical, braking, safety, towing, communications, and other interfaces;
- e. Includes all required towing equipment and associated hardware;
- f. Includes all required safety equipment;
- g. Is delivered with all required vehicle manuals, warranty information, keys, documentation, and other deliverables;
- h. Has completed all required Contractor inspection and preparation prior to delivery; and
- i. Is provided with the full applicable manufacturer warranty.

The Prime Hauler shall be available for First Article testing when required to verify towing, interface, operational, safety, and performance compatibility between the vehicle and MCPV trailer.

B.8 PRODUCTION MCPV TRAILERS

CLINs 0004, 1001, 2001, 3001, and 4001 provide for Production Tier II MCPV trailers and integrated mission systems during the applicable ordering periods.

Each Production MCPV trailer shall conform to:

- a. All applicable requirements of the contract and PWS;
- b. The Government-approved First Article configuration;
- c. The approved production configuration baseline; and
- d. Any subsequent configuration changes authorized in writing by the Contracting Officer.

Except as otherwise authorized in writing by the Contracting Officer, Production MCPV trailers shall not proceed into production prior to written Government approval of the First Article.

The applicable FFP unit price shall include all labor, engineering, materials, equipment, fabrication, integration, inspection, testing, documentation, familiarization, packaging, transportation, delivery, warranty, overhead, profit, and other costs necessary to furnish one complete and Government-acceptable Production MCPV trailer and integrated mission system.

B.9 PRODUCTION PRIME HAULER VEHICLES

CLINs 0005, 1002, 2002, 3002, and 4002 provide for new Prime Hauler Vehicles during the applicable ordering periods.

Each Prime Hauler Vehicle shall meet the requirements of the PWS and shall be fully compatible with the MCPV trailer with which it is intended to operate.

The applicable FFP unit price shall include:

- a. The complete new vehicle;
- b. Manufacturer-installed equipment;
- c. Contractor-installed equipment and accessories;
- d. Towing equipment and interfaces;
- e. Required vehicle modifications;
- f. Electrical and braking interfaces;
- g. Safety equipment;
- h. Inspection and preparation;
- i. Required documentation;
- j. Manufacturer warranty;
- k. Transportation and delivery; and
- l. All other costs necessary to provide a complete, operational, and compatible Prime Hauler Vehicle.

B.10 RELATIONSHIP BETWEEN TRAILER AND PRIME HAULER CLINS

Separate CLINs are established for MCPV trailers and Prime Hauler Vehicles to provide pricing transparency, property accountability, and ordering flexibility.

Separate pricing does not divide the Contractor's responsibility for overall system compatibility.

The Contractor is responsible for ensuring that each Prime Hauler Vehicle ordered for use with an MCPV trailer is compatible with the associated trailer and satisfies all contract requirements applicable to the combined configuration.

The Contractor shall identify and resolve interface issues between the MCPV trailer and Prime Hauler Vehicle before Government acceptance.

Where a delivery order requires both a trailer and a Prime Hauler Vehicle, Government acceptance of one item does not relieve the Contractor from responsibility for ensuring satisfactory operation of the combined MCPV capability.

B.11 COMPLETE MCPV TRAILER PRICING

The MCPV trailer CLIN price shall include everything necessary to provide the complete integrated trailer and mission system except for the separately priced Prime Hauler Vehicle and specifically identified Government-Furnished Property.

No separate payment will be made for:

- a. Program management;
- b. Engineering;
- c. Design and configuration management;
- d. Materials and components;
- e. Subcontractor effort;
- f. C4 equipment and integration;
- g. Power-generation and electrical systems;
- h. HVAC;
- i. Mast and antenna systems;
- j. Software and firmware configuration;
- k. Required licenses necessary for operation at acceptance;
- l. Inspection and testing;
- m. Technical documentation;
- n. Initial operator and maintenance familiarization;
- o. Packaging;
- p. Freight;
- q. Transportation;
- r. Travel;
- s. Lodging;
- t. Warranty;
- u. Contractor-incurred incidental expenses; or
- v. Other costs necessary to perform the MCPV trailer requirements.

Such costs shall be included in the applicable FFP unit price.

B.12 PRIME HAULER PRICING

The Prime Hauler unit price shall be all-inclusive.

The Contractor shall not separately invoice for vehicle preparation, required modifications, towing equipment, accessories, freight, transportation, dealer charges, destination charges, inspection, documentation fees, or other costs necessary to provide the vehicle required by the contract.

Government-imposed taxes or fees, if applicable, shall be treated in accordance with the applicable contract clauses.

B.13 OTHER DIRECT COSTS AND MISCELLANEOUS EXPENSES

This contract does **not** establish a general Other Direct Cost (ODC), travel, miscellaneous expense, or reimbursable expense CLIN.

Normal Contractor expenses associated with performance shall be included in the applicable FFP CLIN price.

The Contractor shall not separately invoice the Government for travel, lodging, materials, subcontractor expenses, freight, shipping, fuel, tools, testing, engineering, or incidental costs necessary to perform the contract.

If the Government subsequently identifies a separately identifiable supply or service that is within the scope of the contract and is not covered by an existing CLIN, the Contracting Officer may establish an appropriate CLIN through written contract modification before ordering that requirement.

A generic ODC or miscellaneous CLIN shall not be used as authority to order unidentified supplies or services.

B.14 CONFIGURATION CONTROL

Following First Article approval, the Contractor shall maintain configuration control of the approved MCPV production baseline.

The Contractor shall not substitute, delete, relocate, or materially modify an approved component, subsystem, interface, material, design, or configuration without prior written authorization from the Contracting Officer when the change affects or may affect:

- a. Form, fit, or function;
- b. Performance;
- c. Interoperability;
- d. Maintainability;
- e. Reliability;
- f. Safety;
- g. Cybersecurity;
- h. Electromagnetic compatibility;
- i. Weight or dimensions;
- j. Electrical demand or generation;
- k. Heating or cooling requirements;
- l. Structural characteristics;

- m. Vehicle-to-trailer compatibility;
- n. Warranty; or
- o. Other contract requirements.

Contractor-requested substitutions resulting from obsolescence, manufacturer discontinuation, supply-chain availability, or similar circumstances require prior Contracting Officer approval.

Approval of a substitution does not, by itself, entitle the Contractor to an increase in contract price.

B.15 GOVERNMENT-FURNISHED PROPERTY

Government-Furnished Property (GFP), if any, will be specifically identified by the contract or applicable delivery order.

Unless expressly identified as GFP, all materials, components, equipment, software, licenses, tools, supplies, test equipment, and other resources required to perform the contract shall be Contractor-furnished and included in the applicable FFP.

Where GFP is furnished for incorporation into or integration with an MCPV trailer, the Contractor remains responsible for proper receipt, protection, accountability, integration, installation, configuration, and testing in accordance with the contract.

B.16 DELIVERY ORDERS

The Government will order MCPV trailers and Prime Hauler Vehicles through written delivery orders issued by an authorized Contracting Officer.

Each delivery order will identify, as applicable:

- a. Contract number;
- b. Applicable CLIN or CLINs;
- c. Quantity;
- d. Unit price;
- e. Total order value;
- f. Funding;
- g. Delivery location;
- h. Required delivery date or schedule;
- i. Applicable production configuration baseline;
- j. Government-Furnished Property, if any; and
- k. Other order-specific administrative information authorized by the contract.

A delivery order shall not be used to add supplies or services outside the scope of the IDIQ contract.

B.17 DELIVERY AND TRANSPORTATION

Unless otherwise expressly stated in the contract, transportation and delivery of each MCPV trailer and Prime Hauler Vehicle to the destination identified in the applicable delivery order shall be included in the applicable FFP.

Differences in Contractor travel distance, freight expense, fuel costs, dealer destination charges, transportation method, lodging, or other Contractor costs associated with delivery do not constitute a basis for separate reimbursement.

B.18 INSPECTION AND ACCEPTANCE

The MCPV trailer and Prime Hauler Vehicle are separately priced deliverables and may be separately inspected and accepted.

However, where both are ordered as an associated MCPV capability, the Contractor remains responsible for successful interface and operational compatibility between the two items.

A partially completed trailer, incomplete mission system, vehicle lacking required equipment or modifications, or other nonconforming configuration does not constitute an acceptable deliverable.

The Government's acceptance of an individual item does not waive latent defects, warranty requirements, or the Contractor's responsibility for compliance with the contract.

B.19 INVOICING AND PAYMENT

The Contractor may invoice following Government acceptance of the applicable CLIN deliverable in accordance with the inspection, acceptance, and payment provisions of the contract.

Unless separately authorized by the contract, purchase of components, commencement of fabrication, completion of interim milestones, shipment, or arrival at the delivery location does not independently constitute entitlement to payment.

Payment shall be based upon the FFP established for the applicable CLIN and delivery order.

B.20 OPTIONS

Exercise of an option extends the period during which the Government may issue delivery orders against the applicable option-period CLINs.

Exercise of an option does not obligate the Government to order any minimum quantity during the option period.

Option-period quantities are estimates only.

B.21 ADDITIONAL OR OPTIONAL REQUIREMENTS

The Contractor shall not provide or invoice the Government for additional equipment, accessories, enhancements, services, or other items that are not required by the contract or expressly ordered by an authorized Contracting Officer.

The following shall not be ordered through a generic ODC or miscellaneous CLIN:

- a. Additional training beyond the initial familiarization included with each MCPV trailer;
- b. Spare-parts packages;
- c. Non-warranty repair services;
- d. Replacement components purchased independently of a complete MCPV trailer;
- e. Replacement Prime Hauler Vehicles beyond quantities ordered under the established vehicle CLINs;
- f. Post-delivery system upgrades or modifications;
- g. Additional technical-data packages; or
- h. Other separately identifiable supplies or services.

If the Government determines that one of these requirements should be independently orderable and it is within the scope of the contract, the Contracting Officer shall establish an appropriately described and priced CLIN through written contract modification before ordering the requirement.

Section C - Description/Specifications/Statement of Work

Clauses By Full Text

C.1 General Description

The Contractor shall design, engineer, manufacture, integrate, inspect, test, document, train, deliver, warrant, and support Tier II Mobile Command Post Vehicle (MCPV) systems that provide rapid-deployment command, control, communications, and computer capabilities for FBI missions. Each MCPV shall be delivered as a complete, fully integrated, fully tested, roadworthy, and operationally ready system.

C.2 Contract Requirements Documents

The work shall be performed in accordance with the following requirements documents identified in Section J:

- a. Performance Work Statement (PWS), Tier II Mobile Command Post Vehicle;
- b. Technical Specifications, Tier II Mobile Command Post Vehicle;
- c. Master Requirements Traceability Matrix, as incorporated into the contract or applicable delivery order; and
- d. Other drawings, interface data, Government-furnished equipment lists, test requirements, or order-specific attachments expressly incorporated into the contract or delivery order.

The PWS defines the required design/build process, management approach, first-article effort, production approach, testing, training, warranty, and deliverables. The Technical Specifications define the minimum vehicle, trailer, power, environmental, communications, network, audio/video, radio-frequency, structural, safety, and operational requirements.

C.3 Contract and Delivery-Order Relationship

The base IDIQ contract establishes the general scope, requirements, terms, and conditions applicable to all orders. Each delivery order will identify the specific quantity, ordered configuration, optional items, Government-furnished equipment or information, delivery location, schedule, funding, and any other requirements applicable to that order.

A delivery order may further define or select among contractually authorized configurations but shall not revise the scope or terms of the base contract. Any conflict shall be resolved in accordance with the Order of Precedence provision or clause included in Section I.

C.4 Phased Design/Build Approach

The Contractor shall perform the requirement as a phased design/build effort. The work shall include requirements validation, concept design, preliminary design, digital-model review and physical mockup review when ordered, critical design review, establishment of an approved configuration baseline, fabrication and testing of one production-representative first article, correction and retesting of deficiencies, and transition to controlled production if additional trailers are ordered.

Government participation in design reviews is intended to provide operational input, permit selection among compliant alternatives, identify usability concerns, and verify progress. Government review, comment, concurrence, witnessing, or approval shall not relieve the Contractor of responsibility for the adequacy, integration, safety, regulatory compliance, maintainability, or performance of the design.

C.5 First-Article Requirement

The Contractor shall produce one production-representative first-article Tier II MCPV trailer in accordance with the approved design baseline. The Contractor shall perform the required inspections, demonstrations, and tests; submit all required test data and reports; correct and retest deficiencies; provide final as-built documentation; and support Government first-article review and approval.

The approved and accepted first article shall be an operational deliverable, shall serve as the manufacturing and configuration standard for subsequent production vehicles, and shall count as one of the thirteen trailers contemplated under the contract.

C.6 Production Vehicles

Following written first-article approval, the Government may, but is not obligated to, order up to twelve additional production trailers. Each production vehicle shall conform to the approved first-article configuration and all Contracting Officer-approved engineering changes applicable to that vehicle. Each vehicle shall be separately inspected, tested, documented, trained, delivered, and accepted.

The Contractor shall not incorporate substitutions, component changes, software changes, design changes, or production deviations without compliance with the contract configuration-management requirements and written authorization when required.

C.7 Prime Haulers

When identified in a delivery order, the Contractor shall provide, upfit, integrate, test, document, deliver, and warrant an associated prime hauler vehicle meeting the Technical Specifications. The Contractor shall ensure complete interoperability between the prime hauler and the MCPV trailer, including electrical, fuel, generator, camera, emergency-lighting, communications, interface, and safety systems.

C.8 Government-Furnished Property, Equipment, and Information

Government-furnished property, equipment, and information, when applicable, will be identified in the contract or individual delivery order. The Contractor shall identify required interfaces and Government decision dates during requirements validation; inspect furnished items upon receipt; promptly notify the Contracting Officer of damage, shortages, incompatibilities, or insufficient information; and integrate furnished items into the complete MCPV system as required by the contract.

C.9 Requirements Traceability and Objective Verification

The Contractor shall maintain the Master Requirements Traceability Matrix throughout contract performance. The matrix shall identify each requirement, applicable design or implementation reference, verification method, objective acceptance criteria, inspection or test record, deficiency or corrective-action status, engineering-change reference, and final Government verification status.

The matrix is a traceability and administration tool and does not independently change the contract. Only the Contracting Officer may authorize a change to the contract requirements, price, delivery schedule, or approved configuration baseline.

C.10 Deliverables

The Contractor shall provide all design, engineering, program-management, quality, inspection, test, training, warranty, software, configuration, and as-built deliverables required by the PWS, Technical Specifications, Master Requirements Traceability Matrix, and applicable delivery order. Deliverables shall be complete, accurate, revision controlled, searchable, and identified to the applicable contract, order, vehicle, configuration, date, and revision.

Section D - Packaging and Marking

Clauses By Full Text

D.1 General

The Contractor shall preserve, protect, package, secure, and mark each MCPV, prime hauler, component, accessory, spare, tool, document, and other deliverable in a manner that prevents damage, deterioration, contamination, loss, tampering, or unsafe conditions during storage, handling, loading, transportation, unloading, and delivery. Commercial practices are acceptable when they provide protection equal to or greater than the requirements of this section.

D.2 Vehicle and Installed-System Protection

Each vehicle shall be delivered clean and protected from weather, road debris, moisture, corrosion, vibration, and movement during transportation. Doors, windows, roof openings, slide-outs, mast systems, awnings, antennas, cabinets, equipment racks, monitors, cameras, batteries, generator components, and other movable or sensitive items shall be secured in their transport configuration.

Protective coverings, blocking, bracing, or temporary shipping devices shall not damage finishes, obscure required safety information, interfere with lawful transportation, or require destructive removal. All temporary shipping restraints and protective materials shall be identified and removed by the Contractor before final turnover unless the Government directs otherwise.

D.3 Loose-Shipped Equipment and Accessories

Loose-shipped equipment, keys, tools, cables, adapters, remotes, spare components, consumables, manuals, credentials, and accessories shall be individually protected and packaged by vehicle. Each package or container shall include an itemized contents list and shall identify the corresponding vehicle identification number, trailer serial number, delivery order number, and package sequence, as applicable.

D.4 Documentation and Electronic Media

Hard-copy documents, when required, shall be protected from moisture and damage. Electronic media shall be packaged to prevent loss or corruption and shall be free of malicious code. Passwords, administrative credentials, cryptographic information, or other sensitive access information shall not be placed in an unsecured shipping container or displayed on an exterior packing list. Such information shall be transferred using a Government-approved secure method.

D.5 Marking

Shipping documents, packing lists, and loose-shipped packages shall identify, as applicable:

- a. Contract number and delivery order number;
- b. Contractor name;
- c. Delivery destination and Government point of contact;
- d. Vehicle identification number, trailer serial number, or other unique identifier;
- e. Package number and total number of packages;

- f. Gross weight and special handling instructions when applicable; and
- g. A complete itemized contents list.

No exterior FBI seal, organizational identification, law-enforcement marking, mission designation, or other Government-identifying marking shall be applied to a vehicle, shipping container, or package unless expressly authorized by the applicable delivery order or the Contracting Officer.

D.6 Government-Furnished and Sensitive Items

Government-furnished property and equipment shall retain all required Government property identification and accountability markings. Controlled Unclassified Information, security-sensitive information, or other protected material shall be packaged, marked, transmitted, and handled in accordance with the contract security requirements and written Government direction.

D.7 Damage, Shortage, or Loss

The Contractor shall promptly notify the Contracting Officer of any known or suspected damage, shortage, loss, tampering, or substitution occurring before Government delivery. Notification and Government observation do not relieve the Contractor of responsibility for correction, replacement, transportation, or other obligations under the contract.

Section E - Inspection and Acceptance

Clauses By Full Text

E.1 General

Inspection and acceptance shall be governed by the applicable clauses in Section I, this Section E, the PWS, Technical Specifications, approved test procedures, Master Requirements Traceability Matrix, and the applicable delivery order. Acceptance is the responsibility of the Contracting Officer or an authorized Government representative designated in writing.

The Contractor is responsible for tendering only supplies and deliverables that conform to all contract requirements. Government inspection, review, witnessing, comment, concurrence, or approval does not relieve the Contractor of responsibility for design adequacy, materials, workmanship, integration, safety, regulatory compliance, quality, testing, documentation, or final contract compliance.

E.2 Contractor Inspection and Quality Control

The Contractor shall perform all inspections, examinations, analyses, certifications, demonstrations, and tests necessary to substantiate compliance before tendering any design deliverable, first article, production vehicle, prime hauler, documentation package, or other deliverable to the Government. The Contractor shall maintain complete objective evidence and make it available to the Government upon request.

The Contractor shall implement the approved Quality Control Plan and shall maintain material and component traceability, inspection records, test data, nonconformance reports, corrective-action records, configuration records, and final compliance certifications for each vehicle.

E.3 Government Access and In-Process Inspection

The Government may inspect work and review records at any time and place where contract performance occurs, including Contractor and subcontractor facilities, subject to reasonable coordination and applicable security and safety requirements. The Contractor shall provide access to the work, personnel, records, equipment, facilities, and test data necessary for Government quality assurance.

Government in-process inspections may include design reviews, material and component inspections, structural and fabrication inspections, wiring and workmanship inspections, system-integration inspections, configuration audits, functional demonstrations, test witnessing, and review of quality and corrective-action records.

E.4 Design Deliverable Review and Approval

Design deliverables shall be submitted in accordance with the PWS and approved schedule. Government review or approval of a design deliverable authorizes progression only to the extent stated in the written approval. Design approval is not final acceptance of the MCPV, does not constitute a warranty waiver, and does not shift design responsibility to the Government.

The Contractor shall not begin irreversible vehicle fabrication before the Contracting Officer provides the written authorization required following Critical Design Review, except for long-lead materials or activities expressly authorized in writing.

E.5 First-Article Inspection, Testing, and Approval

The Contractor shall perform first-article testing on one production-representative Tier II MCPV trailer in accordance with FAR 52.209-3, the contract, the Government-approved First-Article Test Plan, and the Master Requirements Traceability Matrix.

First-article testing shall normally be conducted at the Contractor's facility. The Contractor shall provide the facilities, equipment, instrumentation, personnel, utilities, safety support, test procedures, records, and other resources necessary to conduct the required testing.

Government representatives intend to be present for designated first-article inspections, demonstrations, and tests. Government personnel may witness testing, observe test execution, review instrumentation and measurements, participate in demonstrations, request repetition of test steps when reasonably necessary to verify results, examine test data and records, and perform or require supplemental verification necessary to determine compliance.

Government participation in, witnessing of, or observation of first-article testing does not transfer responsibility for conducting the required first-article testing from the Contractor to the Government and does not relieve the Contractor of responsibility for demonstrating complete compliance with the contract.

The first article shall be fabricated and integrated using processes, controls, tooling, suppliers, and facilities representative of the Contractor's proposed production approach to the extent practicable. The Contractor is not required to reserve or use the same facility for all potential follow-on quantities; however, any material difference between first-article and planned production facilities, processes, tooling, suppliers, or controls shall be disclosed to the Contracting Officer and addressed in the production-transition and configuration-control approach before production release.

The Contractor shall provide the advance notice required by FAR 52.209-3 and the approved schedule so the Government may review procedures and attend designated inspections, demonstrations, and tests. The Contractor shall submit complete procedures, objective pass/fail criteria, raw data, inspection and test records, certifications, deficiency records, corrective actions, regression-test results, and a final First-Article Test Report.

The Contracting Officer will provide written approval, conditional approval, or disapproval of the First Article. Approval shall not be inferred from Government attendance, participation, witnessing, review comments, possession, use, or authorization to continue limited activities.

E.6 First-Article Acceptance and Contract Quantity

First-article approval and final acceptance are separate determinations. Final acceptance of the first article requires successful completion of all required inspections, tests, and demonstrations; correction and reverification of deficiencies affecting compliance or safe operation; completion of required training; delivery and approval of the final as-built documentation and warranty package; and written acceptance by the Contracting Officer or authorized representative.

When approved and accepted, the first article shall be delivered as an operational MCPV and shall count as one of the maximum thirteen trailers. If the first article is consumed, destroyed, materially damaged, or rendered nonoperational during testing, it shall not count toward the delivered contract quantity unless restored to full contract compliance and accepted by the Government.

E.7 Production Before First-Article Approval

Except for specifically authorized long-lead materials or limited activities, the Contractor shall not begin production of additional trailers before written first-article approval. Any unauthorized production activity undertaken before approval is performed at the Contractor's sole risk and shall not limit the Government's right to require correction, redesign, replacement, or retesting.

E.8 Production-Vehicle Inspection and Acceptance

Each production vehicle shall be separately inspected, tested, documented, and accepted. Production acceptance shall verify conformity to the approved first-article configuration, all Contracting Officer-approved engineering changes applicable to the vehicle, the Technical Specifications, and all order-specific requirements.

The Contractor shall perform approved production acceptance testing and submit a vehicle-specific acceptance package that includes, at a minimum, configuration certification, completed requirements traceability status, inspection and test results, deficiency and corrective-action status, as-built documentation, software and programming files, licenses and credentials, training records, warranty documentation, and all other required deliverables.

E.9 Objective Acceptance Standard

A deliverable is acceptable only when objective evidence demonstrates that it meets all applicable contract quality, quantity, configuration, documentation, safety, and performance requirements. A requirement shall remain open until the Government records it as Verified or Not Applicable in the Master Requirements Traceability Matrix and all associated deficiencies are closed or otherwise dispositioned in writing by the Contracting Officer.

E.10 Nonconforming Work, Correction, and Retesting

The Government may reject nonconforming or incomplete supplies, services, tests, records, or deliverables. The Contractor shall, at no increase in contract price, correct or replace rejected work and repeat the inspections, tests, demonstrations, analyses, certifications, or document submissions necessary to demonstrate compliance, except to the extent otherwise authorized by the Contracting Officer in a written contract modification.

Corrective action shall include regression testing or reverification of affected systems and interfaces when necessary to establish that the correction did not create or conceal another deficiency. Government costs associated with reinspection or retesting may be charged to the Contractor when authorized by the applicable contract clause.

E.11 Place of Inspection and Acceptance

Unless an individual delivery order specifies otherwise, Government inspection and final technical acceptance shall occur at the Contractor's facility. The Contractor shall provide suitable facilities, equipment, utilities, personnel, safety support, records, and access necessary to perform Government inspection and acceptance activities.

Acceptance at the Contractor's facility does not alter the Contractor's delivery, transportation, preservation, risk-of-loss, or destination responsibilities established elsewhere in the contract or delivery order.

E.12 Destination Examination

Supplies accepted at the Contractor's facility may be examined at destination for identity, quantity, completeness, damage in transit, tampering, substitution, and fraud. This destination examination is not a second acceptance inspection, but the Contractor remains responsible for obligations relating to delivery damage, shortages, loss, warranty, latent defects, fraud, or gross mistakes amounting to fraud.

E.13 Evidence of Acceptance

Government acceptance shall be evidenced by execution of the applicable inspection and receiving report, acceptance certificate, commercial shipping document, or other written acceptance record designated by the Contracting Officer. Payment, possession, operational use, or Government participation in testing does not constitute acceptance unless the authorized acceptance record has been executed.

Section F - Deliveries and Performance

Clauses By Full Text

F.1 Contract Ordering Period

The contract ordering period shall consist of one one-year base period and four one-year option periods. The Government may issue delivery orders only during the ordering period then in effect. Exercise of an option extends the ordering period only and does not obligate the Government to order any quantity above the contract minimum.

Ordering Period	Start Date	End Date
Base Period	9/30/2026	9/29/2027
Option Period 1	9/30/2027	9/29/2028
Option Period 2	9/30/2028	9/29/2029
Option Period 3	9/30/2029	9/29/2030
Option Period 4	9/30/2030	9/29/2031

F.2 Orders Issued During the Ordering Period

A delivery order issued during an effective ordering period shall remain governed by the contract until completion, even when delivery or performance extends beyond the end of that ordering period. The delivery order shall specify the required completion date. The Contractor shall not be required to make any delivery or complete performance after September 29, 2033.

F.3 Delivery-Order Schedule

Each delivery order shall identify, as applicable, the ordered supplies and services; quantity; configuration or authorized options; delivery destination; design, review, fabrication, testing, training, documentation, and delivery milestones; Government-furnished equipment or information dates; inspection and acceptance location; and final required delivery date.

The schedule stated in the delivery order is binding. A Contractor-proposed lead time or schedule becomes binding only when accepted and incorporated into the contract or delivery order by the Contracting Officer. The Contractor shall not interpret Government participation in design reviews or testing as an extension of the required schedule.

F.4 Contract Minimum and First Article Ordering

At contract award, the Government will order and fund CLIN 0001, Contract Kickoff and Initial Program Planning, in the amount of \$5,000.00. Issuance of CLIN 0001 will satisfy the Government's minimum ordering obligation under the IDIQ contract.

The First Article MCPV trailer and associated Prime Hauler Vehicle are not included in the guaranteed minimum and will be ordered only if and when sufficient funds are available and the Contracting Officer issues a funded delivery order.

Upon issuance of a funded First Article delivery order, the Contractor shall perform the design/build and First Article activities required by the contract and applicable delivery order.

The First Article trailer, when ordered, approved, accepted, and delivered as an operational MCPV, shall count as one of the maximum thirteen trailers available under the contract.

F.5 Required Design/Build Sequence

The initial order schedule shall preserve the following sequence unless the Contracting Officer authorizes a different sequence in writing:

- a. Requirements-validation workshop and submission of the requirements-validation report and action-item log;
- b. Concept Design Review and resolution of consolidated Government comments;
- c. Preliminary Design Review and resolution of consolidated Government comments;
- d. Interactive three-dimensional digital-model review and, when ordered, physical mockup review;
- e. Critical Design Review, resolution of consolidated Government comments, and establishment of the approved configuration baseline;
- f. Written Contracting Officer authorization to begin irreversible first-article fabrication;
- g. First-article fabrication, integration, inspection, and contractor testing;
- h. Government-witnessed first-article testing and operational demonstrations;
- i. Deficiency correction, regression testing, and reverification;
- j. Training and delivery of the final as-built, warranty, software, and configuration documentation;
- k. Written first-article approval, final acceptance, and delivery.

F.6 Production Delivery Orders

Except for Contracting Officer-authorized long-lead materials or limited activities, production of additional trailers shall not begin before written first-article approval. Additional production trailers will be furnished only when ordered by a funded delivery order. Each production delivery order shall identify the quantity ordered and the required delivery schedule. Production vehicles shall be manufactured to the approved first-article configuration, as modified only by Contracting Officer-approved engineering changes applicable to the order.

The Government may order production trailers individually or in quantities, subject to the contract maximum quantity, contract ceiling, order limitations, available funding, and the delivery schedule stated in each order.

F.7 Government Review and Contractor Resubmission Periods

Government review periods and Contractor resubmission periods shall be identified in the applicable delivery order or approved integrated schedule. The Contractor shall plan for the review cycles included in the firm-fixed price and shall submit complete, internally reviewed deliverables early enough to preserve the required order completion date.

A Government review period begins only upon receipt of a complete and reviewable submittal. Time required to correct incomplete, internally inconsistent, or nonconforming Contractor submittals does not constitute Government-caused delay. Any request for schedule adjustment must be submitted to the Contracting Officer with timely notice, supporting facts, affected critical-path activities, and proposed mitigation.

F.8 Place of Performance

The primary place of performance shall be the Contractor facility and any approved subcontractor or supplier facilities. The Contractor shall identify and maintain the facilities, equipment, personnel, utilities, security,

safety controls, and test capabilities necessary to perform the work. Government review or approval of a facility does not relieve the Contractor of responsibility for performance.

F.9 Delivery Destinations

Delivery destinations shall be specified in individual delivery orders and may be located throughout the Continental United States. The Government may direct delivery of different vehicles or ancillary items to different destinations. The Contractor shall confirm site-access, routing, height, weight, turning, unloading, and delivery restrictions sufficiently in advance to meet the required delivery date.

F.10 Delivery Terms

Unless an individual delivery order expressly states otherwise, all deliveries shall be F.o.b. destination. Contract prices shall include transportation, insurance, permits, routing, escorts when required, temporary transport equipment, loading, securement, unloading or placement required by the order, and all other costs necessary to complete delivery without additional charge to the Government.

Technical inspection and acceptance at the Contractor facility do not alter the Contractor's F.o.b. destination, transportation, preservation, or risk-of-loss obligations. The Contractor remains responsible for loss, shortage, damage, tampering, and deterioration occurring before completed delivery at destination, except as otherwise provided by the contract clauses.

F.11 Advance Delivery Notice

The Contractor shall provide preliminary written notice of planned delivery not less than 60 calendar days before the anticipated delivery date and shall provide final confirmation not less than 14 business days before delivery. The notice shall identify the contract and delivery order, vehicle identification number or trailer serial number, delivery date and time, carrier and driver information when available, dimensions and weight, special handling or access needs, and the Contractor delivery representative.

F.12 Delivery Documentation

At or before delivery, the Contractor shall provide the shipping and delivery documentation required by Section D and the applicable order, including the contract and delivery-order numbers; vehicle identification number or trailer serial number; itemized list of installed and loose-shipped items; acceptance and inspection records; title, registration, certificate-of-origin, or similar ownership documents when applicable; warranty documentation; and the name and contact information of the Government receiving official.

F.13 Completion of Delivery

Delivery is complete only when the vehicle and all ordered supplies, accessories, keys, tools, cables, documents, software, licenses, credentials, and other deliverables have arrived at the specified destination; transportation restraints and temporary protective materials have been removed as directed; shortages and transportation damage have been documented; and the Government receiving official has acknowledged receipt. Receipt at destination does not constitute technical acceptance when technical acceptance occurred or remains pending under Section E.

F.14 Delays and Schedule Risk

The Contractor shall notify the Contracting Officer in writing as soon as the Contractor knows or reasonably should know of an actual or potential delay. The notice shall identify the cause, affected requirements and milestones, critical-path effect, actions taken or proposed to avoid or recover delay, and any Government decision or item needed. Notice does not excuse delay or authorize a schedule change. Only the Contracting Officer may revise a required delivery or performance date.

Section G - Contract Administration Data

Clauses By Full Text

G.1 Contracting Officer

The Contracting Officer is the only Government official authorized to enter into, administer, modify, suspend, terminate, or otherwise change the contract; issue or modify delivery orders; authorize changes to the requirements, price, schedule, or configuration baseline; approve or disapprove the first article; and make final determinations on behalf of the Government, except to the extent authority is expressly delegated in writing.

Contracting Officer	Melissa Golicz
Email	mgolicz@fbi.gov

G.2 Contracting Officer Representative

The Contracting Officer may designate a Contracting Officer Representative (COR) in writing. The designation will identify the scope and limitations of the COR's authority. The COR may perform technical monitoring, coordinate Government participation, review deliverables, provide consolidated technical comments, observe inspections and tests, and make recommendations to the Contracting Officer.

The COR is not authorized to change the contract or delivery order; authorize additional work; direct a change to the approved configuration; waive requirements; change price, quantity, funding, or schedule; approve the first article; accept nonconforming work; or otherwise bind the Government. The Contractor shall immediately refer any direction that may affect contract terms to the Contracting Officer before acting.

COR	To be designated in writing by the Contracting Officer after award.
Email	To be provided with the COR designation.

G.3 Contractor Program Manager

The Contractor shall designate a Program Manager as the primary administrative and technical point of contact for the contract and each delivery order. The Program Manager shall have authority to coordinate Contractor and subcontractor resources, maintain the integrated schedule and required logs, commit the Contractor to corrective actions within the contract, and elevate issues requiring Contracting Officer action.

G.4 Activities and Officials Authorized to Issue Orders

Delivery orders may be issued only by FBI Contracting Officers who possess appropriate warrant authority and are specifically authorized to place orders under the contract. No other Government employee, customer representative, COR, inspector, engineer, technical reviewer, or program official may place an order or authorize performance.

Oral orders are not authorized. All orders and order modifications must be issued in writing through a Government contract-writing system, electronic document-access system, or other written electronic method authorized by the Contracting Officer.

G.5 Delivery-Order Content

Each delivery order will identify, as applicable:

- a. Contract and delivery-order number;
- b. Ordering office and Contracting Officer;
- c. Ordered supplies, services, quantity, configuration, and authorized options;
- d. Firm-fixed prices and total order value;
- e. Accounting and appropriation data and total funds obligated;
- f. Delivery and performance schedule;
- g. Place of performance and delivery destination;
- h. Government-furnished property, equipment, information, or access;
- i. Order-specific security, marking, installation, testing, training, documentation, warranty, and support requirements;
- j. Inspection and acceptance location and authorized acceptance official;
- k. Invoice and payment instructions.

G.6 Order Acknowledgment and Review

The Contractor shall promptly acknowledge receipt of each delivery order and order modification. Before beginning performance, the Contractor shall review the document for completeness, consistency, scope, funding, schedule, security, GFE/GFI dependencies, and technical interfaces. The Contractor shall promptly notify the issuing Contracting Officer of any apparent error, omission, conflict, or ambiguity. The Contractor shall not proceed based on an assumption that changes the contract or order.

G.7 Contract and Order Communications

Formal notices, requests for Contracting Officer direction, requests for equitable adjustment, schedule notices, engineering-change proposals, deviation requests, and other communications affecting contractual rights or obligations shall be submitted to the Contracting Officer in writing, with a copy to the COR when designated. Routine technical coordination may occur with authorized Government personnel, but such coordination does not change the contract or order.

G.8 Status Reporting and Meetings

The Contractor shall submit monthly status reports and maintain the integrated schedule and program logs required by the PWS. The Contractor shall conduct progress meetings at the frequency identified by the Contracting Officer or delivery order. Minutes, decisions, action items, responsible parties, and due dates shall be documented by the Contractor and submitted for Government review. Meeting minutes do not authorize a contract change.

G.9 Invoice Submission

The Contractor shall submit a separate invoice for each delivery order unless the Contracting Officer authorizes another method in writing. The Contractor may invoice only for supplies, services, milestones, or deliverables that have been ordered, completed, and accepted, or for payments otherwise expressly authorized by the contract or order. Unordered work, unexercised options, unaccepted deliverables, and costs incurred in anticipation of an order are not invoiceable.

Invoices shall be submitted through the electronic invoicing system identified by the Contracting Officer or payment office in the award or applicable delivery order, in accordance with Section I and the applicable delivery order.

The Contractor shall not submit duplicate invoices through email or another system unless directed by the Contracting Officer or payment office.

G.10 Minimum Invoice Content

In addition to the requirements of the applicable payment clause, each invoice shall include:

- a. Contract number and delivery-order number;
- b. Contractor legal name, remittance address, UEI, and invoice number and date;
- c. Applicable line-item number, description, quantity, unit, unit price, and extended amount;
- d. Vehicle identification number, trailer serial number, or deliverable identifier, when applicable;
- e. Date and evidence of Government acceptance or the applicable authorized payment milestone;
- f. Shipping or delivery information, when applicable;
- g. Name of the Contracting Officer, COR, and Government receiving or acceptance official, as applicable;
- h. Total amount invoiced, cumulative amount previously invoiced, and remaining order balance;
- i. Any additional supporting documentation required by the delivery order.

G.11 Invoice Review and Rejection

An invoice may be rejected when it is incomplete, inaccurate, unsupported, inconsistent with the contract or order, submitted before acceptance or an authorized payment event, or includes unordered or nonconforming work. Rejection of an improper invoice does not constitute acceptance, a change to the contract, or a waiver of Government rights.

G.12 Payment Office

Electronic invoicing system	Invoice Processing Platform (IPP) at www.IPP.gov
-----------------------------	---

G.13 Accounting, Appropriation, and Funding Data

Accounting and appropriation data will be identified on each funded delivery order or order modification. The basic IDIQ contract does not authorize performance or obligate funds beyond the contract minimum ordered and funded by the Government. The Contractor shall not perform work in excess of the amount funded or beyond the scope of an order without a written modification issued by the Contracting Officer.

G.14 Inspection, Acceptance, and Receiving Reports

The Government official authorized to accept supplies or services will be identified in the contract, delivery order, COR designation, or other written Contracting Officer designation. Acceptance shall be documented through the designated receiving-report or acceptance process. Contractor invoices shall reference the corresponding acceptance record when required by the payment system or order.

G.15 Contractor Payment Address

The Offeror shall identify in its proposal any payment or remittance address that differs from the address shown in SAM or elsewhere in the proposal. After award, the Contractor shall promptly notify the Contracting Officer and payment office of an authorized change. Changes to banking information shall be made through the applicable Government registration or payment system and shall not be accepted solely through an email request.

**G.16 Administrative Changes**

The Contractor shall promptly notify the Contracting Officer of changes to its legal name, ownership, address, points of contact, SAM registration, UEI, CAGE code, banking information, production facility, key personnel, ISO 9001 certification status or scope, or other information material to contract administration or responsibility. Notification does not authorize a novation, change-of-name agreement, facility transfer, substitution of a different certified entity, or other contract change.

Section H - Special Contract Requirements

Clauses By Full Text

H.1 Applicability and Relationship to Other Contract Requirements

The requirements in this section apply to the basic contract and all delivery orders unless an order expressly states a more specific requirement that is authorized by the basic contract. A delivery order may select among authorized configurations, options, destinations, or schedules, but shall not expand the scope of the basic contract or waive a contract requirement. Conflicts shall be resolved under the applicable order-of-precedence provision or clause in Section I.

H.2 Firm-Fixed-Price Design/Build Responsibility

The Contractor shall perform the design/build effort for the firm-fixed prices established by the contract and applicable delivery order. The fixed price includes the design-development process, required meetings and reviews, included comment cycles, design refinement within the stated requirements and the Contractor's proposed compliant design envelope, first-article fabrication and testing, correction and retesting of Contractor noncompliance, documentation, training, warranty, and acceptance support.

The Contractor remains responsible for selecting a technically sound means of meeting the requirements and for the adequacy, completeness, integration, safety, regulatory compliance, producibility, maintainability, and performance of the design.

H.3 Government Design Participation

Government personnel may participate in requirements validation; review layouts, digital models, mockups, drawings, calculations, and system architecture; provide operational input; select among compliant alternatives; witness inspections and tests; and make recommendations. Government participation is intended to improve mission suitability and does not create a Government design, transfer design responsibility, or authorize performance outside the contract.

H.4 Classification of Design Comments and Requested Changes

Each material design comment or requested revision shall be treated as one of the following:

- a.** Contractor correction. The proposed design or work does not meet an existing contract requirement. The Contractor shall correct the noncompliance, including required redesign and reverification, at no additional cost.
- b.** Included design refinement. The Government selects or refines a compliant alternative within the existing requirements and the Contractor's proposed compliant design envelope. The Contractor shall incorporate the refinement within the firm-fixed price and schedule.
- c.** Government-directed change. The Government requests a new or materially revised requirement, quantity, configuration, equipment item, interface, delivery condition, or post-baseline change outside the contracted design envelope. The Contractor shall not proceed unless the Contracting Officer issues written authorization or a contract modification.

When the parties disagree on classification, the Contractor shall continue all unaffected work and request written direction from the Contracting Officer. The Contractor shall not proceed with disputed changed work based solely on technical discussions or schedule pressure.

H.5 Consolidated Comments and Included Review Cycles

The Government will provide consolidated comments through the Contracting Officer or authorized representative. The firm-fixed price includes the initial submission and up to two consolidated Government review-and-comment cycles for each required design review. Additional revisions required solely to correct Contractor noncompliance, incomplete submissions, internal inconsistency, or failure to address prior comments shall be performed at no additional cost.

H.6 No Oral or Constructive Changes

No oral statement, meeting discussion, inspection observation, email, design comment, recommendation, approval, payment, use, or failure to object changes the contract or delivery order. The Contractor shall not rely on direction from any person other than the Contracting Officer when the direction may affect requirements, price, quantity, schedule, funding, risk allocation, acceptance, or the approved configuration baseline.

H.7 Configuration Baseline and Engineering-Change Control

Following written approval, the final design package shall become the controlled configuration baseline for the first article and production vehicles. The Contractor shall maintain configuration identification, status accounting, change control, and configuration-verification records throughout performance.

Each proposed engineering change, substitution, deviation, or waiver shall identify the technical basis; affected requirement IDs, drawings, software, components, and interfaces; weight, axle-load, center-of-gravity, power, HVAC, network, RF, safety, reliability, maintainability, schedule, price, warranty, training, documentation, and testing effects; implementation point; affected vehicles; and proposed verification. No change to the approved baseline is authorized until approved in writing by the Contracting Officer.

H.8 First-Article Production Restriction

The Contractor shall not begin production of any additional trailer before written first-article approval, except for long-lead material acquisition or limited activities specifically authorized in writing by the Contracting Officer. Such authorization does not constitute first-article approval or acceptance, does not obligate the Government to order any additional trailer, and does not relieve the Contractor of the risk that correction or redesign may be required.

H.9 Requirements Traceability Matrix

The Contractor shall maintain the Master Requirements Traceability Matrix as a controlled contract-administration and verification record. The matrix shall trace each requirement to the proposal response, approved design or implementation reference, verification method, objective evidence, deficiency status, engineering-change history, and final Government verification status.

A Contractor entry of Compliant does not close a requirement. A requirement is closed only when the Government records it as Verified or Not Applicable and all linked deficiencies are closed or otherwise dispositioned in writing by the Contracting Officer. The matrix supports, but does not replace, the contract, approved drawings, test procedures, test records, acceptance documentation, or Contracting Officer direction.

H.10 Quality Control and Nonconformance Management

The prime Contractor shall maintain a current ISO 9001-certified Quality Management System throughout contract performance. The certification shall identify the prime Contractor as a certified organization and shall encompass quality-management activities applicable to the work performed by the prime under this contract. Certification held solely by a parent company, affiliate, subcontractor, supplier, teaming partner, or other entity that does not identify the prime Contractor as a certified organization does not satisfy this requirement.

Before irreversible first-article fabrication, the Contractor shall submit and maintain a vehicle-specific Quality Control Plan implementing the certified Quality Management System for this requirement. The Contractor shall document inspections, tests, material and component traceability, supplier controls, nonconformances, root-cause analysis, corrective actions, regression testing, configuration effects, and closure evidence. Use-as-is, repair, deviation, or waiver dispositions affecting a contract requirement require Contracting Officer approval before implementation or acceptance.

The Contractor shall notify the Contracting Officer promptly of any suspension, withdrawal, expiration without renewal, material reduction in certified scope, change in the certified legal entity, or other condition that may affect continued compliance with the ISO 9001 requirement. Applicable higher-level quality requirements shall be flowed down to subcontractors and suppliers performing work for which those controls are necessary under the contract.

H.11 Key Personnel

At a minimum, the Contractor shall designate a Program Manager, lead design or systems engineer, quality lead, and manufacturing or production lead. These individuals shall possess authority and experience commensurate with their responsibilities. The Contractor shall notify the Contracting Officer before replacing a designated individual and shall provide the proposed replacement's qualifications, availability, and transition plan. Replacement personnel shall possess qualifications sufficient for the responsibilities of the position and shall be subject to Contracting Officer approval when required by the applicable delivery order or approved staffing plan.

H.12 Subcontractors, Suppliers, and Original Equipment Manufacturers

The Contractor is fully responsible for the performance, quality, schedule, security, and compliance of its subcontractors, suppliers, dealers, service partners, and original equipment manufacturers. Government consent to, knowledge of, or communication with a subcontractor does not create privity of contract or relieve the Contractor of responsibility.

The Contractor shall ensure that subcontracts and purchase orders contain the requirements necessary to support Government access, inspection, traceability, configuration control, warranty, software licensing, documentation, cybersecurity, delivery obligations, and applicable higher-level quality controls for the subcontracted work. The prime Contractor remains responsible for determining and documenting the controls necessary to ensure subcontracted and supplied items conform to the approved configuration and contract requirements.

H.13 Government-Furnished Property, Equipment, and Information

Government-furnished property, equipment, and information will be identified at the delivery-order level. The Contractor shall identify required Government-furnished items, interfaces, decisions, access, and need dates during requirements validation and shall promptly notify the Contracting Officer of missing, damaged, late, incompatible, or insufficient items or information.

The Contractor shall inspect Government-furnished items upon receipt, maintain accountability and protection, integrate them into the system as required, and return or deliver them as directed. Government furnishing or review of an item does not relieve the Contractor of integration responsibility except to the extent a documented Government-caused condition affects performance and the Contractor provides timely written notice.

H.14 Security and Information Handling

The Contractor shall protect Controlled Unclassified Information, law-enforcement-sensitive information, system security information, facility information, credentials, software configurations, radio or network information, and other protected information in accordance with Section I, the applicable delivery order, and written Government security direction.

The Contractor shall not receive, generate, store, transmit, discuss, or use classified information unless the delivery order and applicable security requirements expressly authorize classified performance. The Contractor

shall not connect equipment to a Government network, use Government credentials, or introduce software, media, or remote-access capability without prior Government authorization.

H.15 Cybersecurity, Software, and Administrative Access

Software, firmware, applications, embedded systems, remote-monitoring functions, and network-connected components shall be delivered in a secure and supportable configuration. Default credentials shall be changed or disabled before acceptance. Administrative credentials, license keys, configuration files, source configuration data, recovery media, and required registration information shall be transferred using a Government-approved secure method.

The Contractor shall identify any component that requires recurring subscriptions, cloud connectivity, remote vendor access, telemetry, end-user license acceptance, or continued manufacturer support. No undisclosed recurring fee, remote dependency, or third-party access condition may be required for normal Government operation of an accepted vehicle.

H.16 Component Selection, Substitution, and Obsolescence

The Contractor shall select components suitable for the required operating environment and expected service life and shall consider availability, maintainability, interoperability, warranty, and lifecycle support. The Contractor shall promptly notify the Contracting Officer of an actual or anticipated discontinuance, allocation, shortage, or obsolescence affecting the approved design or schedule.

No material, component, manufacturer, model, software product, or supplier identified in the approved configuration may be substituted without the required engineering-change documentation and written Contracting Officer approval. A proposed equal or improved item does not authorize unilateral substitution.

H.17 Technical Data, Drawings, and Proprietary Restrictions

The Contractor shall provide the technical data, drawings, calculations, software files, configuration records, manuals, parts information, and other deliverables required by the PWS and orders in searchable PDF and editable native format unless otherwise specified. The final as-built package shall accurately reflect the exact accepted configuration of each vehicle.

Rights in technical data, computer software, and commercial license materials are governed by the applicable clauses in Section I. The Contractor shall identify proposed proprietary, limited-rights, restricted-rights, copyrighted, licensed, or third-party-controlled material before award or before first use when the restriction could affect the Government's required operation, maintenance, repair, competition, data access, or lifecycle support. Delivery of data does not expand or reduce the parties' rights established by the contract clauses.

H.18 Warranty Administration

The warranty period for each accepted MCPV and ordered prime hauler shall begin upon Government acceptance. The Contractor shall serve as the single point of contact for warranty administration and shall coordinate all supplier, dealer, subcontractor, and original-equipment-manufacturer warranty actions. All transferable warranties, registrations, licenses, and access rights shall be transferred to the Government at acceptance.

Warranty work shall preserve the approved configuration and shall be documented. The Contractor shall update affected drawings, software files, parts lists, manuals, and configuration records when warranty work changes the accepted configuration. A warranty repair does not waive other Government rights relating to latent defects, fraud, gross mistakes amounting to fraud, or other contract remedies.

H.19 Nationwide Service and Support

The Contractor shall provide the nationwide service and technical-support capability required by the PWS for each vehicle actually ordered and accepted. The capability may be provided through Contractor facilities, authorized service partners, OEM/dealer networks, field service, or a combination thereof, provided the Contractor remains the Government's single point of accountability. Before acceptance of the first article, the

Contractor shall provide support contacts, escalation procedures, warranty procedures, service locations or authorized partners, hours of availability, parts-ordering procedures, and procedures for obtaining emergency support for an operational breakdown.

H.20 Safety, Regulatory Compliance, and Permits

The Contractor is responsible for all licenses, permits, certifications, approvals, inspections, transportation authorizations, and safety measures necessary to design, fabricate, test, transport, and deliver the ordered vehicles. The Contractor shall promptly notify the Contracting Officer of any safety-related defect, recall, regulatory noncompliance, stop-work condition, accident, or event that may affect a Government vehicle or the approved design.

H.21 Photography, Publicity, and Government Identification

The Contractor shall not photograph, record, display, advertise, publish, release, or use the FBI name, seal, vehicle configuration, mission equipment, Government personnel, facility, or contract performance for marketing, publicity, social media, trade shows, portfolio materials, or other external purposes without prior written Contracting Officer approval. This restriction applies to subcontractors, suppliers, and visitors.

H.22 Travel and Incidental Costs

Unless a delivery order expressly establishes a separately reimbursable item, all travel, lodging, per diem, shipping, permits, escorts, testing expenses, and incidental costs necessary to perform the order are included in the applicable firm-fixed price. The Contractor shall not invoice such costs separately.

H.23 Government Access to Facilities and Records

The Contractor shall provide reasonable Government access to the Contractor and subcontractor facilities, work in process, personnel, equipment, records, test data, and quality documentation necessary for design review, inspection, surveillance, testing, verification, and acceptance. Access shall be coordinated to protect safety, security, and proprietary information but shall not be unreasonably delayed or restricted.

H.24 Notice of Risks, Defects, and Potential Delays

The Contractor shall promptly provide written notice of technical, quality, supplier, schedule, security, safety, licensing, configuration, or cost risks that may affect compliance or timely performance. Notice shall include the affected requirement and order, current impact, root cause if known, mitigation, recovery plan, decisions needed, and date by which Government action is required. Notice does not transfer Contractor risk or authorize additional compensation.

H.25 Final Turnover and Order Closeout

Before final order closeout, the Contractor shall deliver all required vehicles, equipment, spares, documentation, software, licenses, credentials, training records, warranties, inspection and test records, configuration records, deficiency closure evidence, Government-property records, and other deliverables. The Contractor shall identify and resolve outstanding actions, invoices, property, security items, and data restrictions. Closeout does not waive warranties or other continuing obligations.

**Section I - Contract Clauses****Clauses By Reference****52.252-2 CLAUSES INCORPORATED BY REFERENCE (FEB 1998)**

This contract incorporates one or more clauses by reference, with the same force and effect as if they were given in full text. Upon request, the Contracting Officer will make their full text available. Also, the full text of a clause may be accessed electronically at this/these address(es): www.acquisition.gov

Clause	Title	Fill-ins (if applicable)
52.203-3	Gratuities (Apr 1984)	
52.203-5	Covenant Against Contingent Fees (May 2014)	
52.203-6	Restrictions on Subcontractor Sales to the Government (Jun 2020)	
52.203-7	Anti-Kickback Procedures (Jun 2020)	
52.203-8	Cancellation, Rescission, and Recovery of Funds for Illegal or Improper Activity (May 2014)	
52.203-10	Price or Fee Adjustment for Illegal or Improper Activity (May 2014)	
52.203-12	Limitation On Payments to Influence Certain Federal Transactions (Jun 2020)	
52.203-13	Contractor Code of Business Ethics and Conduct (Nov 2021)	
52.203-14	Display of Hotline Poster(s) (Nov 2021)	
52.203-19	Prohibition on Requiring Certain Internal Confidentiality Agreements or Statements (Jan 2017)	
52.204-10	Reporting Executive Compensation and First-Tier Subcontract Awards (Jun 2020)	
52.204-13	System for Award Management Maintenance (Oct 2018)	
52.204-19	Incorporation by Reference of Representations and Certifications (Dec 2014)	

Clause	Title	Fill-ins (if applicable)
52.209-10	Prohibition on Contracting with Inverted Domestic Corporations (Nov 2015)	
52.210-1	Market Research (Nov 2021)	
52.211-5	Material Requirements (Aug 2000)	
52.215-2	Audit and Records-Negotiation (Jun 2020)	
52.215-8	Order of Precedence - Uniform Contract Format (Oct 1997)	
52.215-14	Integrity of Unit Prices (Nov 2021)	
52.217-9	Option to Extend the Term of the Contract (Mar 2000)	
52.219-8	Utilization of Small Business Concerns (Jan 2025)	
52.219-9	Small Business Subcontracting Plan (Jan 2025)	
52.219-16	Liquidated Damages-Subcontracting Plan (Sep 2021)	
52.219-28	Postaward Small Business Program Rerepresentation (Jan 2025)	
52.222-19	Child Labor-Cooperation with Authorities and Remedies (Mar 2026)	
52.222-20	Contracts for Materials, Supplies, Articles, and Equipment (Jun 2020)	
52.222-35	Equal Opportunity for Veterans (Jun 2020)	
52.222-36	Equal Opportunity for Workers with Disabilities (Jun 2020)	
52.222-37	Employment Reports on Veterans (Jun 2020)	
52.222-40	Notification of Employee Rights Under the National Labor Relations Act (Dec 2010)	
52.222-50	Combating Trafficking in Persons (Oct 2025)	
52.222-54	Employment Eligibility Verification (Jan 2025)	
52.222-90	Addressing DEI Discrimination by Federal Contractors (APR 2026)	
52.223-23	Sustainable Products and Services (May 2024)	
52.226-7	Drug-Free Workplace (May 2024)	

Clause	Title	Fill-ins (if applicable)
52.226-8	Encouraging Contractor Policies To Ban Text Messaging While Driving (May 2024)	
52.227-1	Authorization and Consent (Jun 2020)	
52.227-2	Notice and Assistance Regarding Patent and Copyright Infringement (Jun 2020)	
52.227-14	Rights in Data-General (May 2014)	
52.229-3	Federal, State and Local Taxes (Feb 2013)	
52.232-1	Payments (Apr 1984)	
52.232-8	Discounts For Prompt Payment (Feb 2002)	
52.232-11	Extras (Apr 1984)	
52.232-25	Prompt Payment (Jan 2017)	
52.232-33	Payment by Electronic Funds Transfer-System for Award Management (Oct 2018)	
52.232-39	Unenforceability of Unauthorized Obligations (Jun 2013)	
52.232-40	Providing Accelerated Payments to Small Business Subcontractors (Nov 2021)	
52.233-1	Disputes (May 2014)	
52.233-3	Protest after Award (Aug 1996)	
52.233-4	Applicable Law for Breach of Contract Claim (Oct 2004)	
52.242-2	Production Progress Reports (Apr 1991)	
52.242-5	Payments to Small Business Subcontractors (Jan 2017)	
52.242-13	Bankruptcy (July 1995)	
52.242-17	Government Delay of Work (Apr 1984)	
52.243-1	Changes-Fixed-Price (Aug 1987)	
52.244-6	Subcontracts for Commercial Products and Commercial Services (Oct 2025)	
52.245-1	Government Property (Sep 2021)	
52.245-9	Use and Charges (Apr 2012)	
52.246-2	Inspection of Supplies-Fixed-Price (Aug 1996)	

Clause	Title	Fill-ins (if applicable)
52.246-11	Higher-Level Contract Quality Requirement (Dec 2014)	(a): "ISO 9001:2015, Quality management systems — Requirements. No tailoring."
52.246-16	Responsibility for Supplies (Apr 1984)	
52.246-19	Warranty of Systems and Equipment under Performance Specifications or Design Criteria (May 2001)	
52.246-26	Reporting Nonconforming Items (Aug 2024)	
52.248-1	Value Engineering (Jun 2020)	
52.249-2	Termination for Convenience of the Government (Fixed-Price) (Apr 2012)	
52.249-8	Default (Fixed-Price Supply and Service) (Apr 1984)	

Clauses By Full Text

FBI-0023 Federal Bureau of Investigation Electronic Invoicing Requirement (JUL 2024)

The Federal Bureau of Investigation (FBI) requires vendors to submit a proper invoice and supporting documentation electronically through the Invoice Processing Platform (IPP). IPP is a secure, web-based electronic invoicing system provided by the U.S. Department of the Treasury's Bureau of the Fiscal Service (Treasury) in partnership with the Federal Reserve Bank of St. Louis (FRSTL). IPP is available at no cost to any commercial vendor or independent contractor doing business with a participating government agency.

Invoice Submission

Vendors are required to create and submit electronic invoices using the IPP system. All supporting documentation shall be uploaded into the IPP system.

Invoices must be submitted at least monthly but no more than bi-weekly. Final invoices must be submitted 30 days after the end date of the period of performance.

Invoices submitted by email will not be accepted. This requirement applies immediately upon contract award. For contract-specific questions, please contact the contracting officer.

Obtaining IPP Access

If your company has already enrolled in IPP: You will not be required to re-register. Please contact your company's IPP account administrator so that he/she may add you as an additional user to your company's IPP collector account.

If your company has NOT enrolled in IPP: Your company will be auto enrolled for IPP using information from your SAM account. Your company's Primary Electronic Business Point of Contact (POC) will be designated as an IPP administrator. This POC will be contacted by email to register when the FBI initiates the enrollment process through IPP. To prevent

enrollment delays, please ensure your designated Electronic Business POC in sam.gov is up to date. Your company's IPP administrator will be responsible for initial account registration as well as creating and managing your company's IPP users and permissions. Please note that due to U.S. Department of the Treasury guidelines, IPP cannot set up User IDs using a shared email address.

How to register for IPP:

1. Once FBI Initiates the enrollment process, your company's designated Electronic Business POC in sam.gov will receive two emails from IPP Customer Support (noreply@mail.eroc.twai.gov). The first email contains the initial administrative IPP User ID. The second email, sent with 24 hours of receipt of the first email, contains a temporary password. You must log in with the temporary password within 30 days.
2. Registration is complete when the initial administrative user logs into the IPP web site with the User ID and password provided and accepts the IPP rules of behavior. Additional user accounts, including administrators, can be created after initial login.

Training

Vendor training materials, including a first-time login tutorial, are available on the IPP.gov website. Once you have logged in to the IPP application, you will have access to user guides that provide step-by-step instructions for all IPP capabilities ranging from creating and submitting an invoice to setting up email notifications.

Additional Support

IPP Customer Support Team is available Monday through Friday from 8:00 am to 6:00 pm EST. Phone: (866) 973-3131 or email: IPPCustomerSupport@fiscal.treasury.gov For answers to frequently asked questions, visit the Vendor FAQ page on the gov web site.

(End of clause)

FBI-0027 Prohibition on Using a Covered Application (No TikTok on Government Devices Act) (Nov 2023)

The Consolidated Appropriations Act, 2023, enacted the No TikTok on Government Devices Act ("the Act"), which instructs the Director of the Office of Management and Budget, in consultation with the Administrator of General Services, the Director of the Cybersecurity and Infrastructure Security Agency, the Director of National Intelligence, and the Secretary of Defense, to develop standards and guidelines for agencies requiring the removal of TikTok from Federal information technology.

Scope Pursuant to the Act, this memorandum applies to "the social networking service TikTok or any successor application or service of TikTok developed or provided by ByteDance Limited or an entity owned by ByteDance Limited" ("covered application") and applies to all "executive agencies" ("agencies"), as that term is defined in 41 U.S.C § 133.2 This memorandum applies to all "information technology," as that term is defined in 40 U.S.C. § 11101(6) (herein after referred to as "IT").

That definition reaches not only IT owned or operated by agencies, but also IT "used by a contractor under a contract with the executive agency that requires the use of that IT, whether expressly or "to a significant extent in the (Pub. L. No. 117-328, div. R, §§ 101-02, available at <https://www.congress.gov/bill/117th-congress/housebill/2617>. 2 Id. § 102(a)) performance of a service or the furnishing of a product." That definition does not, however, "include any equipment acquired by a federal contractor incidental to a federal contract."

Exceptions

The Act permits limited exceptions to the restrictions outlined in this memorandum for law enforcement activities, national security interests and activities, and security research. Exceptions must be granted by an agency head or designee of the

agency head. Agency heads (HCA) remain responsible for ensuring that all individuals with delegated authority under this policy maintain the documentation required and take all necessary actions to mitigate risk posed by covered applications. Such actions shall be submitted in writing to the Contracting Officer for HCA approval.

(End of Clause)

52.252-2 Clauses Incorporated by Reference (Feb 1998)

This contract incorporates one or more clauses by reference, with the same force and effect as if they were given in full text. Upon request, the Contracting Officer will make their full text available. Also, the full text of a clause may be accessed electronically at this/these address(es):

www.acquisition.gov/far-overhaul

www.acquisition.gov

[Insert one or more Internet addresses]

(End of clause)

52.202-1 Definitions (Jun 2020)

When a solicitation provision or contract clause uses a word or term that is defined in the Federal Acquisition Regulation (FAR), the word or term has the same meaning as the definition in FAR 2.101 in effect at the time the solicitation was issued, unless-

- (a) The solicitation, or amended solicitation, provides a different definition;
- (b) The contracting parties agree to a different definition;
- (c) The part, subpart, or section of the FAR where the provision or clause is prescribed provides a different meaning;
- (d) The word or term is defined in FAR part 31, for use in the cost principles and procedures; or
- (e) The word or term defines an acquisition-related threshold, and if the threshold is adjusted for inflation as set forth in FAR 1.109(a), then the changed threshold applies throughout the remaining term of the contract, unless there is a subsequent threshold adjustment; see FAR 1.109(d).

(End of clause)

52.209-3 First Article Approval-Contractor Testing (Sept 1989)

[Contracting Officer shall insert details]

(a) The Contractor shall test First Article quantity: 1 unit(s) of Lot/Item **CLIN 0002 – First Article Tier II MCPV Trailer and Integrated Mission System** as specified in this contract. At least **TBD** calendar days before the beginning of first article tests, the Contractor shall notify the Contracting Officer, in writing, of the time and location of the testing so that the Government may witness the tests.

(b) The Contractor shall submit the first article test report within **TBD** calendar days from the date of this contract to Contracting Officer, FBI Facilities Acquisition Unit, 935 Pennsylvania Avenue NW, Washington, DC 20535-0001 marked "First Article Test Report: Contract No. **TBD**, Lot/Item No. **CLIN 0002 – First Article Tier II MCPV Trailer and Integrated Mission System**" Within **TBD** calendar days after the Government receives the test report, the Contracting Officer shall notify the Contractor, in writing, of the conditional approval, approval, or disapproval of the first article. The notice of conditional approval or approval shall not relieve the Contractor from complying with all requirements of the specifications and all other terms

and conditions of this contract. A notice of conditional approval shall state any further action required of the Contractor. A notice of disapproval shall cite reasons for the disapproval.

(c) If the first article is disapproved, the Contractor, upon Government request, shall repeat any or all first article tests. After each request for additional tests, the Contractor shall make any necessary changes, modifications, or repairs to the first article or select another first article for testing. All costs related to these tests are to be borne by the Contractor, including any and all costs for additional tests following a disapproval. The Contractor shall then conduct the tests and deliver another report to the Government under the terms and conditions and within the time specified by the Government. The Government shall take action on this report within the time specified in paragraph (b) of this subsection. The Government reserves the right to require an equitable adjustment of the contract price for any extension of the delivery schedule, or for any additional costs to the Government related to these tests.

(d) If the Contractor fails to deliver any first article report on time, or the Contracting Officer disapproves any first article, the Contractor shall be deemed to have failed to make delivery within the meaning of the Default clause of this contract.

(e) Unless otherwise provided in the contract, and if the approved first article is not consumed or destroyed in testing, the Contractor may deliver the approved first article as part of the contract quantity if it meets all contract requirements for acceptance.

(f) If the Government does not act within the time specified in paragraph (b) or (c) of this subsection, the Contracting Officer shall, upon timely written request from the Contractor, equitably adjust under the changes clause of this contract the delivery or performance dates and/or the contract price, and any other contractual term affected by the delay.

(g) Before first article approval, the acquisition of materials or components for, or the commencement of production of, the balance of the contract quantity is at the sole risk of the Contractor. Before first article approval, the costs thereof shall not be allocable to this contract for (1) progress payments, or (2) termination settlements if the contract is terminated for the convenience of the Government.

(h) The Government may waive the requirement for first article approval test where supplies identical or similar to those called for in the schedule have been previously furnished by the offeror/contractor and have been accepted by the Government. The offeror/contractor may request a waiver.

(End of clause)

52.216-18 Ordering (Aug 2020)

(a) Any supplies and services to be furnished under this contract shall be ordered by issuance of delivery orders or task orders by the individuals or activities designated in the Schedule. Such orders may be issued from 9/30/2026 through 9/29/2031 [insert dates].

(b) All delivery orders or task orders are subject to the terms and conditions of this contract. In the event of conflict between a delivery order or task order and this contract, the contract shall control.

(c) A delivery order or task order is considered "issued" when--

(1) If sent by mail (includes transmittal by U.S. mail or private delivery service), the Government deposits the order in the mail;

(2) If sent by fax, the Government transmits the order to the Contractor's fax number; or

(3) If sent electronically, the Government either--

- (i) Posts a copy of the delivery order or task order to a Government document access system, and notice is sent to the Contractor; or
- (ii) Distributes the delivery order or task order via email to the Contractor's email address.
- (d) Orders may be issued by methods other than those enumerated in this clause only if authorized in the contract.

(End of clause)

52.216-19 Order Limitations (Oct 1995)

(a) *Minimum order.* When the Government requires supplies or services covered by this contract in an amount of less than \$5,000.00, the Government is not obligated to purchase, nor is the Contractor obligated to furnish, those supplies or services under the contract.

(b) *Maximum order.* The Contractor is not obligated to honor--

(1) Any order for a single item in excess of 3 units;

(2) Any order for a combination of items in excess of 6 units; or

(3) A series of orders from the same ordering office within 30 days that together call for quantities exceeding the limitation in paragraph (b)(1) or (2) of this section.

(c) If this is a requirements contract (*i.e.*, includes the Requirements clause at subsection 52.216-21 of the Federal Acquisition Regulation (FAR)), the Government is not required to order a part of any one requirement from the Contractor if that requirement exceeds the maximum-order limitations in paragraph (b) of this section.

(d) Notwithstanding paragraphs (b) and (c) of this section, the Contractor shall honor any order exceeding the maximum order limitations in paragraph (b), unless that order (or orders) is returned to the ordering office within 5 calendar days after issuance, with written notice stating the Contractor's intent not to ship the item (or items) called for and the reasons. Upon receiving this notice, the Government may acquire the supplies or services from another source.

(End of clause)

52.216-22 Indefinite Quantity (Oct 1995)

(a) This is an indefinite-quantity contract for the supplies or services specified, and effective for the period stated, in the Schedule. The quantities of supplies and services specified in the Schedule are estimates only and are not purchased by this contract.

(b) Delivery or performance shall be made only as authorized by orders issued in accordance with the Ordering clause. The Contractor shall furnish to the Government, when and if ordered, the supplies or services specified in the Schedule up to and including the quantity designated in the Schedule as the "maximum." The Government shall order at least the quantity of supplies or services designated in the Schedule as the "minimum."

(c) Except for any limitations on quantities in the Order Limitations clause or in the Schedule, there is no limit on the number of orders that may be issued. The Government may issue orders requiring delivery to multiple destinations or performance at multiple locations.

(d) Any order issued during the effective period of this contract and not completed within that period shall be completed by the Contractor within the time specified in the order. The contract shall govern the Contractor's and Government's rights and obligations with respect to that order to the same extent as if the order were completed during the contract's effective period; *provided*, that the Contractor shall not be required to make any deliveries under this contract after 9/29/2033 [insert date].

(End of clause)

2852.201-70 Contracting Officer's Representative (COR) (Nov 2023)

(a) Mr./Ms. (TBD) of ([Organization]), ([Address]), ([Area Code and Telephone Number] , is hereby designated to act as Contracting Officer's Representative (COR) under[Contract Number] , for the period of [Start Date] through [End Date] (specify the performance period of the contract that the designation covers).

(b) Performance of work under this contract is subject to the technical direction of the COR identified above, or another representative designated in writing by the Contracting Officer. The term "technical direction" includes, without limitation, the following: (i) Receiving all deliverables; (ii) Inspecting and accepting the supplies or services provided in accordance with the terms and conditions of this contract; (iii) Clarifying, directing, or redirecting the contract effort, including shifting work between work areas and locations, filling in details, or otherwise serving to accomplish the contractual statement of work to ensure the work is accomplished satisfactorily; (iv) Evaluating performance of the Contractor; and (v) Certifying all invoices/vouchers for acceptance of the supplies or services furnished for payment.

(c) The COR does not have the authority to issue direction that: (i) Constitutes a change of assignment or work outside the contract specification/work statement/scope of work. (ii) Constitutes a change as defined in the clause entitled "Changes" or other similar contract term. (iii) Causes, in any manner, an increase or decrease in the contract price or the time required for contract performance; (iv) Causes, in any manner, any change in a term, condition, or specification or the work statement/ scope of work of the contract; (v) Causes, in any manner, any change or commitment that affects price, quality, quantity, delivery, or other term or condition of the contract or that, in any way, directs the contractor or its subcontractors to operate in conflict with the contract terms and conditions; (vi) Interferes with the contractor's right to perform under the terms and conditions of the contract; (vii) Directs, supervises, or otherwise controls the actions of the Contractor's employees or a Subcontractor's employees.

(d) The Contractor shall proceed promptly with performance resulting from the technical direction of the COR. If, in the opinion of the Contractor, any direction by the COR or the designated representative falls outside the authority of (b) above and/or within the limitations of (c) above, the Contractor shall immediately notify the Contracting Officer.

(e) Failure of the Contractor and Contracting Officer to agree that technical direction is within the scope of the contract is a dispute that shall be subject to the "Disputes" clause and/or other similar contract term.

(f) COR authority is not re-delegable.

(End of Clause)

2852.203-70 General Non-Disclosure Agreement (Nov 2023)

The provisions of this Non-Disclosure Agreement (NDA) are consistent with and do not supersede, conflict with, or otherwise alter the employee obligations, rights, or liabilities created by existing statute or Executive Order relating to (1) classified information, (2) communications to Congress, (3) the reporting to an Inspector General of a violation of any law, rule, or regulation, or mismanagement, a gross waste of funds, an abuse of authority, or a substantial and specific danger to public health or safety, or (4) any other whistleblower protection. The definitions, requirements, obligations, rights, sanctions, and liabilities created by controlling Executive Orders and statutory provisions are incorporated into this agreement and are controlling.

(End of Provision)

2852.233-70 Protests Filed Directly with the Department of Justice (Nov 2023)

(a) The following definitions apply in this provision:

- (1) "Agency Protest Official" (APO) means the Deciding Official for a procurement protest filed with a contracting activity of DOJ when the contracting officer will not be the Deciding Official because of the protestor's election under JAR 2833.103(b)
- (2) "Deciding Official" means the official who will review and decide a procurement protest filed with the agency. The Deciding Official will be the contracting officer unless the protestor requests pursuant to JAR 2833.103(b) that the protest be decided by an individual above the level of the contracting officer, in which case the HCA will designate an APO to serve as the Deciding Official.
- (3) "Interested Party" means an actual or prospective offeror whose direct economic interest would be affected by the award of a contract or by the failure to award a contract.
- (b) Only interested parties may file a protest.
- (c) An interested party filing a protest with the DOJ has the choice of requesting either that the Contracting Officer or the APO decide the protest.
- (d) A protest filed directly with the DOJ shall:
- (1) Indicate that it is a protest to DOJ.
 - (2) Be filed with the Contracting Officer.
 - (3) State whether the protestor chooses to have the Contracting Officer or the Agency Protest Official decide the protest. If the protestor is silent on this matter, the Contracting Officer will decide the protest.
 - (4) Indicate whether the protestor prefers to make an oral or written presentation of arguments in support of the protest to the deciding official.
 - (5) Include the information required by FAR 33.103(d)(2):
 - (i) Name, address, facsimile number and telephone number of the protestor.
 - (ii) Solicitation or contract number.
 - (iii) Detailed statement of the legal and factual grounds for the protest, to include a description of resulting prejudice to the protestor.
 - (iv) Copies of relevant documents.
 - (v) Request for a ruling by the agency.
 - (vi) Statement as to the form of relief requested.
 - (vii) All information establishing that the protestor is an interested party for the purpose of filing a protest.
 - (viii) All information establishing the timeliness of the protest.
- (e) The decision by the APO is an alternative to a decision by the Contracting Officer. The APO will not consider appeals from the Contracting Officer's decision on an agency protest and a decision by the APO is final and not appealable.
- (f) The Deciding Official may conduct a scheduling conference. The scheduling conference, if conducted, will establish deadlines for oral or written arguments in support of the agency protest and for agency officials to present information in response to the protest issues. The deciding official may hear oral arguments in support of the agency protest at the same time as the scheduling conference, depending on availability of the necessary parties.
- (g) Oral conferences may take place either by telephone or in person.
- (h) The protestor has only one opportunity to support or explain the substance of its protest. DOJ procedures do not provide for any discovery. The deciding official may request additional information from the agency or the protestor. The deciding official will resolve the protest through informal presentations or meetings to the maximum extent practicable.
- (i) A protestor may represent itself or be represented by legal counsel. The DOJ will not reimburse the protestor for any legal fees related to the agency protest.
- (j) The DOJ will stay award or suspend contract performance in accordance with FAR 33.103(f), unless the contract award is justified, in writing, for urgent and compelling reasons or is determined, in writing, to be in the best interest of the Government. The justification or determination shall be approved at a level above the Contracting Officer. The stay or suspension, unless over-ridden, remains in effect until the protest is decided, dismissed, or withdrawn.
- (k) The deciding official will make a best effort to issue a decision on the protest within thirty-five (35) days after the filing date. The decision shall be written, and provided to the protestor using a method that provides for evidence of receipt.
- (l) The DOJ may dismiss or stay proceedings on an agency protest if a protest on the same or similar basis is filed with a forum outside DOJ.

(End of Clause)

FBI-0019 Minimizing Acquisition Security Risks in Deliveries

Contractors shall diligently count and examine all goods tendered for shipment, and receipt for them from foreign suppliers prior to shipment to the Federal Government. Orders issued by the awardee to foreign entity suppliers may NOT directly ship supplies to the Federal Bureau of Investigation. Final delivery of goods shall be completed from the awardee's domestic offices and supply centers to the FBI.

The contractor shall ensure that orders do not mention the words "Federal Bureau of Investigation" or the acronym "FBI" in any shipping instructions provided to the foreign entity supplier. The addressee shall be identified as "United States Government" or "United States Department of Justice" or, as directed by the Contracting Officer, an entity identifier with no reference to the Government.

These precautions with respect to shipping labels and addresses pertain to the delivery of supplies to a facility owned, leased, or controlled by the U.S. Government.

Contractors should price their offers to include and accommodate any costs generated by these shipping arrangements. Offerors should make full disclosure in their offers as to how they intend to implement the shipping and delivery supplies in accordance with restrictions cited above.

End of Clause

FBI-0034 Use of Non-Government Advisors

Offerors/Vendors are advised that the Government is supported by non-government acquisition specialists, who assist the Government in procurement actions. All [proposal/quote] information may be available to these non-government acquisition specialists; however, non-government acquisition specialists will not evaluate proposals or be part of the source selection evaluation board. All non-government acquisition specialists have signed non-disclosure agreements. Due to the nature of the work performed by non-government acquisition specialists, the vendor, is prohibited from competing on or being awarded any FBI requirement other than those placed against the FBI's Procurement Support Services (PSS) Blanket Purchase Agreement (BPA).

By submitting a quote, offer, task order proposal, etc. the Offeror/Vendor understands all proposal or quote information may be available to non-government acquisition specialists.

End of Clause

52.252-1 Solicitation Provisions Incorporated by Reference (Feb 1998)

This solicitation incorporates one or more solicitation provisions by reference, with the same force and effect as if they were given in full text. Upon request, the Contracting Officer will make their full text available. The offeror is cautioned that the listed provisions may include blocks that must be completed by the offeror and submitted with its quotation or offer. In lieu of submitting the full text of those provisions, the offeror may identify the provision by paragraph identifier and provide the appropriate information with its quotation or offer. Also, the full text of a solicitation provision may be accessed electronically at this/these address(es):

Section K - Representations, Certifications and Other Statements of Offerors

Provisions By Full Text

K.1 Annual Representations and Certifications - Noncommercial Acquisition

FAR 52.204-8, Annual Representations and Certifications, applies to this solicitation. The NAICS code for this acquisition is 336212, Truck Trailer Manufacturing, and the small business size standard is 1,000 employees. The Offeror shall ensure that the representations and certifications applicable to this solicitation are current, accurate, complete, and applicable as of the proposal date and shall identify any solicitation-specific changes in the manner required by FAR 52.204-8.

This solicitation is a noncommercial acquisition. FAR 52.212-3, Offeror Representations and Certifications - Commercial Products and Commercial Services, does not apply to the overall acquisition.

K.2 Prime Offeror ISO 9001 Certification Representation

By submission of its proposal, the Offeror represents that the prime Offeror holds a current ISO 9001 certification and that the certification identifies the prime Offeror as a certified organization. The certified scope shall encompass quality-management activities applicable to the work the prime proposes to perform under this contract.

Certification held solely by a parent company, affiliate, subcontractor, supplier, teaming partner, or other entity that does not identify the prime Offeror as a certified organization does not satisfy this representation. The Offeror shall submit a copy of its current ISO 9001 certificate in the proposal location specified by Section L. The Government will use the submitted certificate to verify the certified organization, certification body, certificate number, certified scope, and expiration date. No entry or signature is required directly in Section K. If awarded the contract, the prime Contractor shall maintain the required ISO 9001 certification in accordance with Section H.

K.3 Proposal Exceptions and External-Dependency Certification

The Offeror certifies that all exceptions, qualifications, deviations, assumptions, substitutions, proprietary restrictions, recurring charges, subscriptions, licenses, remote-access conditions, and other external dependencies that may affect compliance, price, schedule, warranty, operation, maintenance, data access, or lifecycle support are expressly disclosed in the proposal in the locations required by Section L.

Unless expressly disclosed, the Offeror represents that its proposal accepts and will comply with the solicitation requirements within the proposed firm-fixed prices. A general reservation of rights, incorporation of standard terms by reference, or reference to an external website does not constitute disclosure of a specific exception or dependency.

K.4 Certification by Proposal Submission

By submission of its proposal, the Offeror certifies that the representations, certifications, and other statements in Section K and the Offeror's applicable SAM representations and certifications are current, accurate, complete, and applicable to this proposal. The signature of the individual authorized to bind the Offeror on the proposal cover letter or other signed proposal document constitutes the Offeror's certification of Section K. No separate signature or entry is required directly in this Section K. Material misrepresentations or omissions may affect eligibility for award and may result in remedies available to the Government.

K.5 Incorporation at Award

Section K will not be physically included in the resulting contract. The successful Offeror's representations and certifications will be incorporated by reference to the extent provided by the applicable contract clauses. Solicitation-specific representations material to award, including the prime Offeror's ISO 9001 representation and disclosed exceptions or dependencies, may be incorporated into the contract or retained in the contract file as appropriate.

Section L - Instructions, Conditions and Notices to Offerors

Provisions By Full Text

52.215-1 Instructions to Offerors-Competitive Acquisition (Nov 2021)

(a) *Definitions.* As used in this provision--

"Discussions" are negotiations that occur after establishment of the competitive range that may, at the Contracting Officer's discretion, result in the offeror being allowed to revise its proposal.

"In writing," "writing," or "written" means any worded or numbered expression that can be read, reproduced, and later communicated, and includes electronically transmitted and stored information.

"Proposal modification" is a change made to a proposal before the solicitation's closing date and time, or made in response to an amendment, or made to correct a mistake at any time before award.

"Proposal revision" is a change to a proposal made after the solicitation closing date, at the request of or as allowed by a Contracting Officer as the result of negotiations.

"Time", if stated as a number of days, is calculated using calendar days, unless otherwise specified, and will include Saturdays, Sundays, and legal holidays. However, if the last day falls on a Saturday, Sunday, or legal holiday, then the period shall include the next working day.

(b) *Amendments to solicitations.* If this solicitation is amended, all terms and conditions that are not amended remain unchanged. Offerors shall acknowledge receipt of any amendment to this solicitation by the date and time specified in the amendment(s).

(c) *Submission, modification, revision, and withdrawal of proposals.*

(1) Unless other methods (e.g., electronic commerce or facsimile) are permitted in the solicitation, proposals and modifications to proposals shall be submitted in paper media in sealed envelopes or packages (i) addressed to the office specified in the solicitation, and (ii) showing the time and date specified for receipt, the solicitation number, and the name and address of the offeror. Offerors using commercial carriers should ensure that the proposal is marked on the outermost wrapper with the information in paragraphs (c)(1)(i) and (c)(1)(ii) of this provision.

(2) The first page of the proposal must show--

(i) The solicitation number;

(ii) The name, address, and telephone and facsimile numbers of the offeror (and electronic address if available);

(iii) A statement specifying the extent of agreement with all terms, conditions, and provisions included in the solicitation and agreement to furnish any or all items upon which prices are offered at the price set opposite each item;

(iv) Names, titles, and telephone and facsimile numbers (and electronic addresses if available) of persons authorized to negotiate on the offeror's behalf with the Government in connection with this solicitation; and

(v) Name, title, and signature of person authorized to sign the proposal. Proposals signed by an agent shall be accompanied by evidence of that agent's authority, unless that evidence has been previously furnished to the issuing office.

(3) *Submission, modification, revision, and withdrawal of proposals.*

(i) Offerors are responsible for submitting proposals, and any modifications or revisions, so as to reach the Government office designated in the solicitation by the time specified in the solicitation. If no time is specified in the solicitation, the time for receipt is 4:30 p.m., local time, for the designated Government office on the date that proposal or revision is due.

(ii)(A) Any proposal, modification, or revision received at the Government office designated in the solicitation after the exact time specified for receipt of offers is "late" and will not be considered unless it is received before award is made, the Contracting Officer determines that accepting the late offer would not unduly delay the acquisition; and--

(1) If it was transmitted through an electronic commerce method authorized by the solicitation, it was received at the initial point of entry to the Government infrastructure not later than 5:00 p.m. one working day prior to the date specified for receipt of proposals; or

(2) There is acceptable evidence to establish that it was received at the Government installation designated for receipt of offers and was under the Government's control prior to the time set for receipt of offers; or

(3) It is the only proposal received.

(B) However, a late modification of an otherwise successful proposal that makes its terms more favorable to the Government, will be considered at any time it is received and may be accepted.

(iii) Acceptable evidence to establish the time of receipt at the Government installation includes the time/date stamp of that installation on the proposal wrapper, other documentary evidence of receipt maintained by the installation, or oral testimony or statements of Government personnel.

(iv) If an emergency or unanticipated event interrupts normal Government processes so that proposals cannot be received at the office designated for receipt of proposals by the exact time specified in the solicitation, and urgent Government requirements preclude amendment of the solicitation, the time specified for receipt of proposals will be deemed to be extended to the same time of day specified in the solicitation on the first work day on which normal Government processes resume.

(v) Proposals may be withdrawn by written notice received at any time before award. Oral proposals in response to oral solicitations may be withdrawn orally. If the solicitation authorizes facsimile proposals, proposals may be withdrawn via facsimile received at any time before award, subject to the conditions specified in the provision at 52.215-5, Facsimile Proposals. Proposals may be withdrawn in person by an offeror or an authorized representative, if the identity of the person requesting withdrawal is established and the person signs a receipt for the proposal before award.

(4) Unless otherwise specified in the solicitation, the offeror may propose to provide any item or combination of items.

(5) Offerors shall submit proposals in response to this solicitation in English, unless otherwise permitted by the solicitation, and in U.S. dollars, unless the provision at FAR 52.225-17, Evaluation of Foreign Currency Offers, is included in the solicitation.

(6) Offerors may submit modifications to their proposals at any time before the solicitation closing date and time, and may submit modifications in response to an amendment, or to correct a mistake at any time before award.

(7) Offerors may submit revised proposals only if requested or allowed by the Contracting Officer.

(8) Proposals may be withdrawn at any time before award. Withdrawals are effective upon receipt of notice by the Contracting Officer.

(d) *Offer expiration date.* Proposals in response to this solicitation will be valid for the number of days specified on the solicitation cover sheet (unless a different period is proposed by the offeror).

(e) *Restriction on disclosure and use of data.* Offerors that include in their proposals data that they do not want disclosed to the public for any purpose, or used by the Government except for evaluation purposes, shall--

(1) Mark the title page with the following legend:

This proposal includes data that shall not be disclosed outside the Government and shall not be duplicated, used, or disclosed in whole or in part for any purpose other than to evaluate this proposal. If, however, a contract is awarded to this offeror as a result of or in connection with the submission of this data, the Government shall have the right to duplicate, use, or disclose the data to the extent provided in the resulting contract. This restriction does not limit the Government's right to use information contained in this data if it is obtained from another source without restriction. The data subject to this restriction are contained in sheets *[insert numbers or other identification of sheets]*; and

(2) Mark each sheet of data it wishes to restrict with the following legend:

Use or disclosure of data contained on this sheet is subject to the restriction on the title page of this proposal.

(f) *Contract award.*

(1) The Government intends to award a contract or contracts resulting from this solicitation to the responsible offeror(s) whose proposal(s) represents the best value after evaluation in accordance with the factors and subfactors in the solicitation.

(2) The Government may reject any or all proposals if such action is in the Government's interest.

(3) The Government may waive informalities and minor irregularities in proposals received.

(4) The Government intends to evaluate proposals and award a contract without discussions with offerors (except clarifications as described in FAR 15.306(a)). Therefore, the offeror's initial proposal should contain the offeror's best terms from a cost or price and technical standpoint. The Government reserves the right to conduct discussions if the Contracting Officer later determines them to be necessary. If the Contracting Officer determines that the number of proposals that would otherwise be in the competitive range exceeds the number at which an efficient competition can be conducted, the Contracting Officer may limit the number of proposals in the competitive range to the greatest number that will permit an efficient competition among the most highly rated proposals.

(5) The Government reserves the right to make an award on any item for a quantity less than the quantity offered, at the unit cost or prices offered, unless the offeror specifies otherwise in the proposal.

(6) The Government reserves the right to make multiple awards if, after considering the additional administrative costs, it is in the Government's best interest to do so.

(7) Exchanges with offerors after receipt of a proposal do not constitute a rejection or counteroffer by the Government.

(8) The Government may determine that a proposal is unacceptable if the prices proposed are materially unbalanced between line items or subline items. Unbalanced pricing exists when, despite an acceptable total evaluated price, the price of one or more line items is significantly overstated or understated as indicated by the application of cost or price analysis techniques. A proposal may be rejected if the Contracting Officer determines that the lack of balance poses an unacceptable risk to the Government.

(9) If a cost realism analysis is performed, cost realism may be considered by the source selection authority in evaluating performance or schedule risk.

(10) A written award or acceptance of proposal mailed or otherwise furnished to the successful offeror within the time specified in the proposal shall result in a binding contract without further action by either party.

(11) If a post-award debriefing is given to requesting offerors, the Government shall disclose the following information, if applicable:

(i) The agency's evaluation of the significant weak or deficient factors in the debriefed offeror's offer.

(ii) The overall evaluated cost or price and technical rating of the successful and the debriefed offeror and past performance information on the debriefed offeror.

(iii) The overall ranking of all offerors, when any ranking was developed by the agency during source selection.

(iv) A summary of the rationale for award.

(v) For acquisitions of commercial products, the make and model of the product to be delivered by the successful offeror.

(vi) Reasonable responses to relevant questions posed by the debriefed offeror as to whether source-selection procedures set forth in the solicitation, applicable regulations, and other applicable authorities were followed by the agency.

(End of provision)

L.1 GENERAL INSTRUCTIONS

The Offeror shall submit a clear, concise, and internally consistent proposal addressing only the information requested in this Section L. The Government has intentionally limited the technical submission to the matters presenting the greatest performance risk and those necessary to distinguish among competing proposals. The Offeror should provide specific evidence and a feasible approach rather than restating the Performance Work Statement (PWS) or Technical Specifications.

The Government intends to award one single-award, Firm-Fixed-Price (FFP), Indefinite-Delivery/Indefinite-Quantity (IDIQ) contract using a best-value tradeoff. The Government may award without discussions. The Offeror's initial proposal should therefore contain its best technical approach and price and should clearly identify every exception, qualification, deviation, assumption, substitution, proprietary restriction, recurring charge, or external dependency.

The Offeror shall examine the entire solicitation, including all amendments, Attachment 1 – Performance Work Statement (PWS), Attachment 2 – Technical Specifications, Attachment 3 – Requirements Traceability Matrix (RTM), Attachment 4 – Price Template, Attachment 5 – Questions Template, and all provisions and clauses incorporated into the solicitation.

Nothing in Section L authorizes an Offeror to take exception to a mandatory solicitation requirement. Any proposed exception or deviation shall be clearly identified in accordance with L.4 and L.8.

L.2 PROPOSAL SUBMISSION

- a. Narrative volumes shall be submitted as searchable PDF files. The Price Template and Master Requirements Traceability Matrix shall be submitted in their native Microsoft Excel formats. The native Excel files will control for evaluation of the information contained in those workbooks.
- b. Each file name shall identify the Offeror, volume, factor, and document name. Files shall open without a password, proprietary viewer, cloud service, external website, or Internet connection.
- c. Proposal content shall not be incorporated by reference to marketing materials, external websites, prior proposals, or documents not included in the proposal. This restriction does not prevent the Government from obtaining past-performance or responsibility information from sources other than those identified by the Offeror.
- d. The Government will not evaluate narrative content exceeding the stated page limitation. Attachments excluded from a page limitation shall not be used to provide narrative information that was required to be included within a page-limited volume.
- e. Information contained in one proposal volume may be considered in evaluating another factor when the relationship is apparent; however, the Offeror remains responsible for submitting the information expressly required for each factor.

- f. Proposals shall be submitted electronically via email to the Contracting Officer listed in the SAM.gov solicitation posting no later than the date and time specified in Block 9 of the SF-33.
- g. Late proposals, modifications, and revisions will be handled in accordance with the applicable provisions of the solicitation.

L.3 PROPOSAL ORGANIZATION AND PAGE LIMITS

The proposal shall be organized as follows:

Volume I – Administrative and Contractual Submission

Page Limit: No stated limit.

Evaluation Treatment: Administrative compliance review under M.1.

Volume II – Factor 1: Technical Approach and Performance Risk

Page Limit: Twelve (12) narrative pages.

The following are excluded from the twelve-page limit:

- Up to five (5) conceptual drawing pages;
- Completed Attachment 3 – Master Requirements Traceability Matrix;
- One integrated design-build/first-article schedule; and
- One current ISO 9001 certificate.

Evaluation Treatment: M.3.

Volume III – Factor 2: Relevant Experience and Past Performance

Submission Limit: Not more than three (3) projects and not more than two (2) narrative pages per project.

Government-obtained past-performance records and information obtained directly from customer references are excluded from the page limitation.

Evaluation Treatment: M.4.

Volume IV – Factor 3: Price

Submission: Completed Attachment 2 – RFP Price Template in native Microsoft Excel format.

An optional price explanation, when necessary under L.7, shall not exceed two (2) pages.

Evaluation Treatment: M.5.

Narrative pages shall use 8.5-by-11-inch pages, margins of at least 0.75 inch, Arial font no smaller than 10 points, and legible tables and graphics. An 11-by-17-inch page counts as two pages unless it is one of the

excluded conceptual drawing pages. Excluded conceptual drawing pages shall contain drawings, dimensions, legends, and brief explanatory callouts only.

L.4 VOLUME I – ADMINISTRATIVE AND CONTRACTUAL SUBMISSION

Volume I shall contain the following. Except where expressly stated otherwise in Section M, these items will not receive a comparative technical rating.

- a.** A signed cover letter identifying the Offeror's:
 - Legal name;
 - Address;
 - Unique Entity Identifier (UEI);
 - CAGE Code;
 - Point of contact;
 - Proposal acceptance period; and
 - Individual authorized to bind the Offeror.
- b.** A table of contents, list of submitted files, and acknowledgment of all solicitation amendments.
- c.** Completed Section K representations, certifications, and solicitation-specific statements, together with evidence of active registration in the System for Award Management (SAM).
- d.** A concise organization and teaming summary identifying, as applicable:
 - The prime Offeror;
 - Major subcontractors;
 - Principal suppliers;
 - Proposed design authority;
 - System integrator;
 - First-article fabrication/integration facility; and
 - Anticipated production facility or facilities.

The summary shall identify the principal responsibility of each major team member. The Government is not requesting detailed organization charts or resumes in Volume I.

- e.** A consolidated Exceptions, Qualifications, Deviations, and Assumptions Matrix. If none apply, state "None."

For each entry, identify:

1.
 1. The affected solicitation, PWS, Technical Specification, CLIN, or other requirement;
 2. The proposed exception, qualification, deviation, assumption, or alternative;
 3. The reason for the proposed treatment; and
 4. Any technical, schedule, warranty, licensing, recurring-cost, or price impact.

- f. For an Offeror that is other than a small business concern and for which a subcontracting plan is required, submit a Small Business Subcontracting Plan complying with FAR 52.219-9, Alternate II, and the applicable requirements of FAR Subpart 19.7.

The Government is not requesting a separate small-business participation factor or narrative beyond the subcontracting plan required by the FAR.

A small business Offeror shall state that a subcontracting plan is not required.

L.5 VOLUME II – FACTOR 1: TECHNICAL APPROACH AND PERFORMANCE RISK

The Offeror shall provide the information required below for Factor 1.

Factor 1 consists of:

1. An **ISO 9001 Pass/Fail Minimum Requirement**; and
2. The following three technical subfactors:
 - **Subfactor 1 – Proposed Concept and Engineering Feasibility;**
 - **Subfactor 2 – Design-Build and First-Article Execution; and**
 - **Subfactor 3 – Production and Lifecycle Support Capability.**

The ISO 9001 requirement is a threshold minimum requirement and is **not** a comparatively rated technical subfactor.

The Government is not requesting a separate narrative addressing every PWS or Technical Specification requirement. The technical proposal shall concentrate on the information necessary to demonstrate:

1. The feasibility and technical credibility of the proposed vehicle concept;
2. The Offeror's approach to collaborative design, first-article development, verification, testing, and approval; and
3. The Offeror's capability to manufacture, support, and, if ordered, scale production of the approved configuration.

The Offeror is not required to complete final design engineering before award. Proposed concepts, preliminary engineering values, and reasonable design assumptions may be used when final values will appropriately be established through the post-award design process.

Factor 1 Material Risk Summary - Cross-Cutting Requirement

The Material Risk Summary is not a separate evaluation subfactor and will not receive a separate rating. Each identified risk will be considered under the Factor 1 technical subfactor to which the risk relates.

Across the three Factor 1 technical subfactors, identify **no more than five (5) material risks** that the Offeror believes are most significant to successful contract performance.

Risks may involve technical maturity, integration, facilities, workforce, suppliers, long-lead components, schedule, production scaling, warranty, proprietary dependencies, recurring services, or lifecycle support.

For each identified risk, state:

- The nature of the risk;
- Potential consequence;
- Planned mitigation;

- Responsible party; and
- The point in contract performance at which the risk is expected to be resolved or reduced to an acceptable level.

The Government is seeking the Offeror's identification of genuine material risks. The Offeror is not expected to identify five risks if fewer than five material risks exist.

L.5.1 ISO 9001 – PASS/FAIL MINIMUM REQUIREMENT

The prime Offeror shall hold a current ISO 9001 certification at the time of proposal submission and shall maintain ISO 9001 certification throughout contract performance.

The submitted certification shall:

1. Identify the prime Offeror as the certified organization; and
2. Encompass quality-management activities applicable to the work the prime Offeror proposes to perform under this contract.

Certification held solely by a parent company, affiliate, subcontractor, supplier, teaming partner, or other entity that does not identify the prime Offeror as a certified organization will not satisfy this requirement.

The Offeror shall submit its current ISO 9001 certificate as an attachment excluded from the Factor 1 page limitation.

The ISO 9001 certification requirement is a minimum **Pass/Fail** requirement as described in M.1.1. It is not a comparative discriminator among Offerors that satisfy the requirement.

Failure to satisfy the ISO 9001 minimum requirement will result in the proposal being rated **Unacceptable under Factor 1 and ineligible for award**, as provided in M.1.1.

L.5.2 SUBFACTOR 1 – PROPOSED CONCEPT AND ENGINEERING FEASIBILITY

Provide a concise description and conceptual drawings sufficient to demonstrate the feasibility and technical credibility of the proposed approach to the Tier II MCPV.

At a minimum, the submission shall depict or describe, as applicable:

- Trailer configuration;
- Interior layout;
- Personnel flow;
- Workstations;
- Conference area;
- Equipment racks;
- Storage;
- Doors and emergency egress;
- Prime-hauler interface when a prime hauler is ordered; and
- General location and integration approach for major power, HVAC, communications, RF, audio/video, mast, camera, network, safety, and exterior systems.

Conceptual drawings are intended to demonstrate feasibility and integration. Final production drawings are not required at proposal submission.

Engineering Feasibility Table

Provide one concise engineering-feasibility table showing the proposed or preliminary values and available margins, as applicable, for:

- Overall dimensions;
- Gross trailer weight rating;
- Estimated fully loaded operating weight;
- Pin weight;
- Axle loading;
- Payload;
- Generator rating;
- Projected maximum electrical load;
- HVAC capacity;
- Projected thermal load;
- Mast height;
- Mast head load;
- Personnel/workstation capacity; and
- Any other physical or engineering limitation material to the proposed concept.

Identify the basis of estimate for preliminary values.

Values that cannot reasonably be finalized before post-award design reviews may be identified as preliminary, provided the Offeror explains the basis for the value and why sufficient design margin exists to support successful final design.

Identify any material assumptions, qualifications, exceptions, or dependencies upon which the proposed concept relies, including significant proprietary, supplier, subscription, licensing, or other external dependencies affecting the feasibility of the proposed design.

Requirements Traceability Matrix

Complete the Offeror-response columns of Attachment 3 – Master Requirements Traceability Matrix. Each requirement shall be identified as:

- **Comply;**
- **Exception;**
- **Not Applicable;** or
- **No Response Required,** when designated by the Government.

A detailed proposal reference and explanation are required for every **Exception** or **Not Applicable** entry and for requirements specifically addressed in this Factor.

A separate narrative reference is not required for every routine **Comply** entry.

The Offeror's signed proposal constitutes its commitment that each unqualified **Comply** entry will be satisfied within the proposed firm-fixed prices and in accordance with the resulting contract.

L.5.3 SUBFACTOR 2 – DESIGN-BUILD AND FIRST-ARTICLE EXECUTION

Describe the Offeror's approach for progressing from award through written Government approval of an approved, production-representative first article.

The approach shall address, as applicable:

- Requirements validation;
- Concept Design Review;
- Preliminary Design Review;
- Digital model or physical mockup review, when ordered;
- Critical Design Review;
- Establishment of the final configuration baseline;
- First-article fabrication and integration;
- Verification and testing;
- Deficiency correction;
- Retesting or regression testing; and
- Written Government approval of the first article.

Integrated Schedule

Provide one integrated schedule showing, at a minimum:

- Major design and review events;
- Government review periods;
- Major long-lead decisions or procurements;
- First-article fabrication and integration;
- Testing and correction periods; and
- Proposed first-article delivery date.

The Government is not requiring a detailed production schedule for all potential follow-on units at proposal submission.

Government Participation and Design Responsibility

Explain how the FBI will participate in the design-review process and select among compliant alternatives while the Contractor retains responsibility for the design and its firm-fixed-price performance obligations.

Address:

- Government design reviews;
- Consolidation and resolution of Government comments;
- Included review cycles;
- Comment adjudication;
- Configuration control;
- Engineering changes;
- GFE/GFI integration;
- Contractor correction of nonconforming or noncompliant work;
- Design refinement included within the firm-fixed price; and
- Government-directed changes requiring authorization by the Contracting Officer.

Quality and Verification Approach

Describe the vehicle-specific quality and verification approach, including:

- Development and maintenance of the vehicle-specific quality plan;
- In-process inspection;

- Supplier and subcontractor quality control;
- Requirements traceability;
- Verification methods;
- Approved test procedures;
- Government witnessing when required;
- First-article testing;
- Objective pass/fail evidence;
- Deficiency documentation and correction;
- Regression or repeat testing when necessary; and
- Transition from the approved first article to controlled production.

Clearly identify how the Offeror will maintain responsibility and control over work performed by subcontractors and suppliers, including quality control and integration of their work into the final vehicle.

L.5.4 SUBFACTOR 3 – PRODUCTION AND LIFECYCLE SUPPORT CAPABILITY

Describe the facilities, workforce, engineering, manufacturing, integration, quality, test, supplier, and management resources the Offeror intends to use for this requirement.

Clearly distinguish work to be performed:

- By the prime Contractor;
- By major subcontractors;
- By principal suppliers; and
- At other proposed facilities.

Address:

- Resources and capacity expected to be available for first-article performance;
- Current workload that may materially affect first-article performance;
- In-house and subcontracted capabilities;
- Allocation of responsibilities among team members;
- Critical and long-lead suppliers;
- Significant single-source dependencies;
- Alternate sources or contingency approaches when reasonably available; and
- The approach for scaling production if follow-on trailers are ordered.

The Offeror is not required to demonstrate that dedicated production capacity for all potential follow-on trailers is presently reserved or idle.

Instead, demonstrate a credible approach for:

1. Successfully producing the first article; and
2. If ordered, scaling production to up to twelve additional production trailers while maintaining the approved configuration, schedule, quality, traceability, and required vehicle-specific records.

Key Personnel

Identify the following proposed key functions in one concise table:

- Program Manager;
- Lead design or systems engineer;
- Quality lead; and

- Manufacturing or production lead.

For each, identify:

- Individual's name, if known;
- Proposed role;
- Decision-making authority;
- Relevant experience; and
- Expected availability.

Full resumes are not required.

Warranty and Lifecycle Support

Describe the proposed warranty and nationwide support approach, including, as applicable:

- Warranty administration;
- Response and repair procedures;
- Service locations or authorized service partners;
- Field support;
- Parts availability;
- Software and configuration turnover;
- Technical-data and documentation turnover;
- Licenses and credentials required for Government use or maintenance;
- Recurring fees or subscriptions;
- Proprietary restrictions;
- Obsolescence-management approach; and
- Supportability over the expected fifteen-year service life.

Identify any aspect of the proposed solution that depends upon:

- A recurring commercial subscription;
- Continued third-party hosting;
- Proprietary software or diagnostic tools;
- Contractor-controlled credentials;
- Sole-source replacement parts;
- Remote contractor access; or
- Any other external dependency necessary to operate, maintain, repair, or support the proposed vehicle.

For each material dependency, describe the nature of the dependency and the Offeror's proposed approach for maintaining Government access to, or supportability of, the vehicle over its expected service life.

L.6 VOLUME III – FACTOR 2: RELEVANT EXPERIENCE AND PAST PERFORMANCE

Submit not more than three (3) recent projects performed by the Offeror or a proposed major subcontractor.

The projects need not individually demonstrate every characteristic listed below. Offerors should select projects that, collectively, provide the Government useful information concerning the team's ability to perform the proposed requirement.

Relevant characteristics may include:

- Custom or specialty vehicle design or manufacture;
- Collaborative design/build;
- Mobile command or communications platforms;
- Integrated communications or C4 systems;
- Power, HVAC, RF, network, audio/video, mast, safety, and vehicle integration;
- First-article, prototype, or developmental fabrication;
- Repeatable production;
- Testing and Government/customer acceptance;
- Configuration control;
- Warranty; and
- Nationwide or geographically dispersed support.

Project Information

For each project, identify:

- Performing entity;
- Performing entity's role;
- Approximate percentage or portion of the project performed by that entity;
- Customer;
- Contract or project number, if applicable;
- Period of performance;
- Contract or project value;
- Scope;
- Magnitude and complexity;
- Vehicle or system quantity, when applicable;
- First-article, developmental, or production content;
- Principal technical results;
- Warranty/support responsibilities;
- Known adverse performance information relevant to Government evaluation; and
- Customer point of contact, email address, and telephone number, if available.

Projects completed within six (6) years before the proposal due date, or ongoing projects with at least one year of performance, will normally be considered recent.

Older projects may be submitted when the Offeror believes the project is uniquely relevant. The Offeror should briefly explain why an older project remains relevant.

Customer References and Government-Obtained Information

The Government may contact customer references identified in the proposal and may obtain past-performance information from CPARS, customer interviews, Government databases, other Government agencies, and any

other credible source. The Government is not limited to the projects or references identified by the Offeror. Failure of a customer reference to respond to a Government inquiry will not, by itself, render the proposal unacceptable or result in an unfavorable evaluation.

L.7 VOLUME IV – FACTOR 3: PRICE

Submit a completed Attachment 4 – Price Template in native Microsoft Excel format.

The Offeror shall not alter Government-controlled:

- CLIN descriptions;
- Estimated quantities;
- Formulas; or
- Workbook structure.

Prices shall be firm-fixed prices and shall include every cost necessary to satisfy the applicable requirement unless the solicitation expressly identifies an item as separately reimbursable.

The Offeror shall identify all recurring fees, subscriptions, licenses, externally hosted services, or other recurring charges necessary to operate, maintain, or support the proposed solution.

Price Explanation

A separate price explanation is required only when necessary to explain:

- A zero-dollar entry;
- An item priced within another line;
- An unusual escalation or discount;
- A recurring fee or subscription;
- A license or externally hosted service;
- An exception or qualification affecting price; or
- Another matter not reasonably apparent from the Price Template.

The price explanation shall not exceed two (2) pages.

L.8 EXCEPTIONS AND CONDITIONAL TERMS

Any exception, qualification, deviation, assumption, substitution, proprietary restriction, recurring charge, or conditional term shall be disclosed in the Volume I Exceptions, Qualifications, Deviations, and Assumptions Matrix and addressed in the affected technical and/or price volume.

Silence does not reserve a right to take exception to a solicitation requirement after award.

An Offeror's failure to identify a qualification or dependency does not relieve the resultant Contractor from satisfying the contract requirements within the awarded firm-fixed prices.

A material exception to a solicitation requirement may render a proposal unacceptable and ineligible for award.

L.9 COMMUNICATIONS AND QUESTIONS

Only the Contracting Officer may amend the solicitation or provide an interpretation binding on the Government.

Oral statements, informal communications, design discussions, or information provided by other Government personnel do not amend the solicitation.

Offerors are responsible for obtaining and acknowledging all solicitation amendments.

Questions must be submitted using Attachment 5 – Questions Template to the Contracting Officer identified as the SAM.gov point of contact. Questions submitted in another format may not be answered.

Questions are due no later than **2 SEPT 2026 at 3:00 p.m. Eastern Time (ET)**.

Section M - Evaluation Factors for Award

Provisions By Full Text

M.1 ADMINISTRATIVE COMPLIANCE REVIEW

The Government will review each proposal for compliance with the administrative submission requirements of the solicitation, including:

- Timely submission;
- Required volumes and files;
- Required native-format Excel files;
- Authorized signature;
- Amendment acknowledgment;
- Section K completion;
- Active SAM registration;
- Page-limit compliance;
- Organization and teaming information;
- Exceptions, Qualifications, Deviations, and Assumptions Matrix; and
- Other administrative and contractual information required by L.4.

Administrative requirements will not receive a comparative technical rating unless the information is expressly evaluated under another factor.

A materially incomplete, inaccessible, unsigned, late, or otherwise nonconforming proposal may be rejected or may require clarification or discussions, as appropriate and at the Government's discretion.

Small Business Subcontracting Plan

For an Offeror that is other than a small business concern and is required to submit a subcontracting plan, the Government will review the Small Business Subcontracting Plan for acceptability in accordance with FAR 52.219-9 and FAR Subpart 19.7.

The subcontracting plan will not receive an adjectival rating and will not be used as a comparative tradeoff discriminator.

Failure to submit and negotiate an acceptable subcontracting plan when required will make the Offeror ineligible for award.

A subcontracting plan is not required from a small business concern.

M.2 BASIS FOR AWARD AND RELATIVE IMPORTANCE

The Government intends to award one contract to the responsible Offeror whose proposal conforms to the solicitation and represents the best value to the Government.

The Government will evaluate the following factors:

1. **Factor 1 – Technical Approach and Performance Risk**
2. **Factor 2 – Relevant Experience and Past Performance**
3. **Factor 3 – Price**

Factor 1 is more important than Factor 2.

The non-price factors, when combined, are significantly more important than Price.

As proposals become more equal in non-price merit and performance risk, Price will become more important in the award decision.

The Government may reject a proposal that:

- Takes a material exception to the solicitation;
- Fails a mandatory Pass/Fail requirement;
- Presents an infeasible or unreasonably high-risk approach;
- Fails to substantiate compliance with a material requirement; or
- Contains a price, assumption, qualification, or external dependency inconsistent with the proposed technical approach.

The Government may award without discussions.

M.3 FACTOR 1 – TECHNICAL APPROACH AND PERFORMANCE RISK

Factor 1 will be evaluated in two stages.

First, the Government will evaluate the **ISO 9001 Pass/Fail Minimum Requirement** in M.1.1. This requirement is a threshold eligibility requirement and is not a rated technical subfactor. An Offeror that does not satisfy the ISO 9001 requirement will be rated **Unacceptable under Factor 1 and will not be eligible for award**.

Second, for Offerors that satisfy the ISO 9001 minimum requirement, the Government will evaluate Factor 1 under the following three technical subfactors:

1. **Subfactor 1 – Proposed Concept and Engineering Feasibility;**
2. **Subfactor 2 – Design-Build and First-Article Execution;** and
3. **Subfactor 3 – Production and Lifecycle Support Capability.**

The Government will consider the findings under all three technical subfactors in assigning **one overall Factor 1 technical rating**. Separate adjectival ratings will not be assigned to the individual subfactors. Evaluators may document strengths, weaknesses, deficiencies, and performance risks under each subfactor, which will be considered in determining the overall Factor 1 rating.

The Government will consider the material risks identified by the Offeror under L.5 in the subfactor to which each risk relates. The Government is not limited to risks identified by the Offeror and may identify additional proposal-related performance risks during its evaluation.

The Government will not reward an Offeror merely for identifying a greater number of risks.

M.3.1 ISO 9001 – PASS/FAIL MINIMUM REQUIREMENT

The Government will evaluate whether the prime Offeror satisfies the ISO 9001 certification requirement established in L.5.

To receive a **Pass**, the submitted certificate must demonstrate that:

1. The prime Offeror holds a current ISO 9001 certification;
2. The prime Offeror is identified as a certified organization; and
3. The certification encompasses quality-management activities applicable to the work the prime Offeror proposes to perform under this contract.

Certification held solely by a parent company, affiliate, subcontractor, supplier, teaming partner, or other entity that does not identify the prime Offeror as a certified organization will not satisfy the requirement.

The ISO 9001 requirement will be evaluated solely as **Pass/Fail**. It is not a comparatively rated technical subfactor. An Offeror will not receive additional comparative credit or a technical strength merely for satisfying this requirement.

A proposal receiving a **Fail** for the ISO 9001 minimum requirement will be rated **Unacceptable under Factor 1 and will not be eligible for award**. The Government need not further evaluate the proposal under the remaining Factor 1 technical subfactors.

M.3.2 SUBFACTOR 1 – PROPOSED CONCEPT AND ENGINEERING FEASIBILITY

The Government will evaluate the feasibility and technical credibility of the proposed vehicle concept. The evaluation will consider:

- Overall vehicle configuration;
- Interior layout and personnel flow;
- Workstations and functional spaces;
- Major-system integration;
- Prime-hauler interface, when applicable;
- Preliminary engineering values;
- Available engineering margins;
- Major system interfaces; and
- Material exceptions, assumptions, qualifications, and dependencies.

The Government will assess whether the proposed concept can reasonably satisfy the solicitation's applicable requirements for:

- Vehicle envelope;
- Occupancy;
- Weight;
- Pin and axle loading;

- Payload;
- Generator and electrical capacity;
- HVAC and thermal performance;
- Mast integration;
- Maintainability;
- Roadworthiness;
- Safety; and
- Service life.

The Government recognizes that final engineering values may appropriately be established during the post-award design process. The evaluation will therefore focus on whether the preliminary values, assumptions, margins, and engineering approach provide a credible basis for successful final design.

The Government will evaluate whether the proposed concept relies upon unsupported assumptions or presents unacceptable technical, proprietary, supplier, subscription, licensing, or other external dependencies.

Requirements Traceability Matrix

The Government will review the completed RTM principally to:

- Identify exceptions;
- Identify unsupported Not Applicable determinations;
- Identify inconsistencies between the RTM and technical proposal; and
- Confirm the Offeror's commitment to satisfy material requirements.

Routine unqualified **Comply** entries will not be individually scored or treated as separate evaluation elements.

M.3.3 SUBFACTOR 2 – DESIGN-BUILD AND FIRST-ARTICLE EXECUTION

The Government will evaluate the realism, effectiveness, and performance risk of the proposed approach for progressing from award through written approval of the production-representative first article.

The evaluation will consider:

- Requirements validation;
- Design-review sequence;
- Government participation;
- Integrated schedule;
- Government review periods;
- Comment resolution;
- Design responsibility;
- Configuration control;
- Engineering-change control;
- GFE/GFI integration;
- Long-lead decisions;
- Quality planning;
- Supplier and subcontractor quality control;
- Requirements traceability;
- Verification methods;
- First-article fabrication and integration;

- Test planning and execution;
- Objective acceptance evidence;
- Deficiency correction;
- Retesting or regression testing; and
- Production-release controls.

The Government will assess whether the proposed approach:

- Provides meaningful FBI participation without improperly transferring design responsibility to the Government;
- Clearly distinguishes Contractor correction of nonconforming work from Government-directed changes;
- Provides a realistic path for completing design within the proposed firm-fixed price and schedule;
- Establishes objective evidence for verification and acceptance;
- Provides appropriate control over subcontractors and suppliers; and
- Establishes a credible path from award through written first-article approval and controlled production release.

The Government will not favor an Offeror merely because it performs a greater percentage of the work in-house. The evaluation will instead consider whether the proposed allocation of responsibilities provides adequate accountability, integration, quality control, and performance risk management.

M.3.4 SUBFACTOR 3 – PRODUCTION AND LIFECYCLE SUPPORT CAPABILITY

The Government will evaluate the credibility of the facilities, workforce, engineering, manufacturing, integration, quality, test, supplier, and management resources proposed for the requirement.

The Government will consider:

- Resources expected to be available for first-article performance;
- Current workload affecting first-article execution;
- In-house and subcontracted capabilities;
- Allocation of responsibilities among team members;
- Key personnel;
- Critical and long-lead suppliers;
- Significant single-source dependencies;
- Alternate sources and contingency approaches; and
- The Offeror's approach to scaling production if follow-on units are ordered.

The Government will **not** evaluate whether the Offeror presently maintains unused or dedicated capacity for all potential follow-on quantities.

Instead, the Government will assess whether the Offeror presents a credible approach for:

1. Successfully producing the first article; and
2. If ordered, scaling to production of up to twelve additional trailers while maintaining the approved configuration, schedule, quality, traceability, and required vehicle-specific records.

Key Personnel

The Government will evaluate whether the proposed Program Manager, lead design or systems engineer, quality lead, and manufacturing or production lead collectively demonstrate appropriate experience, authority, and availability for their proposed responsibilities.

Full resumes are not required, and the Government will not evaluate formatting or volume of personnel information beyond what is necessary to assess these matters.

Warranty and Lifecycle Support

The Government will evaluate the feasibility and effectiveness of the proposed:

- Warranty approach;
- Response and repair procedures;
- Nationwide service capability;
- Service locations or authorized partners;
- Parts support;
- Field support;
- Software and configuration turnover;
- Technical-data and documentation turnover;
- Licenses and credentials;
- Obsolescence-management approach; and
- Supportability over the expected fifteen-year service life.

The Government will consider the extent and performance risk associated with recurring fees, subscriptions, third-party hosting, proprietary restrictions, contractor-controlled credentials, remote-access dependencies, sole-source parts, or other external dependencies necessary to operate, maintain, repair, or support the proposed vehicle.

M.4 FACTOR 2 – RELEVANT EXPERIENCE AND PAST PERFORMANCE

The Government will evaluate the recency, relevance, and quality of the Offeror's and proposed major subcontractors' prior performance and assign one overall past-performance confidence rating.

The Government may consider:

- Projects submitted under L.6;
- CPARS;
- Customer interviews;
- Government databases; and
- Any other credible source.

The Government is not limited to the contacts or projects identified by the Offeror.

Recency

Projects completed within six (6) years before the proposal due date, or ongoing projects with at least one year of performance, will normally be considered recent.

Older work may be considered when uniquely relevant.

Relevance

The Government will evaluate the similarity of prior work to the current requirement in terms of:

- Scope;
- Magnitude;
- Complexity; and
- Performing role.

Characteristics that may increase relevance include:

- Specialty-vehicle design and manufacture;
- Mobile command or communications platforms;
- Collaborative design/build;
- C4 or integrated communications systems;
- Power, HVAC, RF, network, audio/video, mast, safety, and vehicle integration;
- First-article, prototype, or developmental work;
- Repeatable production;
- Configuration control;
- Testing and acceptance;
- Warranty; and
- Nationwide or geographically dispersed support.

No single project is required to demonstrate every characteristic.

Performing Entity and Proposed Role

Experience and past performance attributable to a proposed subcontractor or other team member will be considered **to the extent that the entity is proposed to perform the same or similar work under this acquisition.**

The Government may give less weight to experience or past performance of a team member when:

- The entity performed a substantially different role on the prior effort;
- The proposed role on this acquisition is limited in comparison with the experience being relied upon;
or
- The proposal does not demonstrate that the relevant capability will be available to the contract team.

The Government will not automatically attribute the experience or past performance of one legal entity to another merely because the entities are affiliated.

Quality

The Government will evaluate available information concerning:

- Technical results;
- Workmanship;
- Schedule performance;
- Management;
- Quality control;
- Corrective action;
- Customer satisfaction;
- Warranty and support performance; and
- The nature and resolution of adverse performance information.

The Government will consider the currency, credibility, amount, relevance, and consistency of the available information.

Confidence Assessment

The Government will assign one overall past-performance confidence rating using the definitions in M.7.

An Offeror with no recent and relevant performance record, or a record too limited to support a meaningful assessment, will receive **Neutral Confidence**.

Neutral Confidence is neither favorable nor unfavorable.

M.5 FACTOR 3 – PRICE

Price will not receive an adjectival rating.

The Government will evaluate the completed Price Template for:

- Completeness;
- Mathematical accuracy;
- Internal consistency;
- Consistency with the technical proposal;
- Price reasonableness; and
- Unbalanced pricing.

The Total Evaluated Price will be calculated using the Government-estimated quantities contained in Attachment 4 – Price Template.

The evaluated quantities will include thirteen (13) Tier II MCPV trailers and integrated mission systems, consisting of one production-representative First Article and twelve production trailers, and thirteen (13) Prime Hauler Vehicles, using the quantities assigned to the applicable ordering periods in Attachment 4.

Use of these quantities for evaluation purposes does not guarantee that the Government will order those quantities. The Government's only guaranteed minimum is one First Article trailer and one associated First Article Prime Hauler Vehicle.

The Government may use one or more price-analysis techniques determined appropriate by the Contracting Officer.

The Government may evaluate:

- Materially unbalanced pricing;
- Nominal or front-loaded pricing;
- Recurring charges;
- Subscriptions;
- Licenses;
- Externally hosted services;
- Zero-dollar entries;
- Items priced within other CLINs;
- Escalation;
- Discounts; and
- Inconsistencies between the price and technical proposal.

Use of estimated quantities for evaluation purposes does not guarantee that the Government will order those quantities.

The Government's obligation is limited to the contract minimum and funded delivery orders issued under the resulting contract.

No award or orders may exceed the established contract ceiling.

M.6 TECHNICAL EVALUATION RATINGS

The Government will assign one overall Factor 1 rating after considering the three Factor 1 elements. The overall Factor 1 rating will use the three color-coded adjectival ratings defined below.

Evaluators may document strengths, weaknesses, deficiencies, and performance risks under the individual elements, but will not assign separate adjectival ratings to each element.

The ISO 9001 certification requirement in M.3.2 is separately evaluated on a Pass/Fail basis.

Blue - Exceptional	Proposal exceeds requirements and indicates an outstanding approach and understanding of the requirements. Strengths far outweigh any weaknesses. Risk of unsuccessful performance is low.
Green - Acceptable	Proposal meets requirements and indicates an adequate approach and understanding of the requirements.

	Strengths and weaknesses are offsetting or will have little or no impact on contract performance. Risk of unsuccessful performance is no worse than moderate.
Red - Unacceptable	Proposal does not meet requirements and contains one or more deficiencies. Proposal is un-awardable.

Evaluation Definitions

Strength	Any aspect of a proposal that, when judged against a stated evaluation criterion, enhances the merit of the proposal or increases the probability of successful contract performance.
Significant Strength	A strength that appreciably enhances the merit of the proposal or appreciably increases the probability of successful contract performance.
Weakness	A flaw in the proposal that increases the risk of unsuccessful contract performance.
Significant Weakness	A flaw that appreciably increases the risk of unsuccessful contract performance.
Deficiency	A material failure of a proposal to meet a Government requirement or a combination of significant weaknesses that increases the risk of unsuccessful contract performance to an unacceptable level.

M.7 PAST-PERFORMANCE CONFIDENCE RATINGS

The Government will assign one overall past-performance confidence rating after considering the recency, relevance, quality, amount, credibility, and consistency of available past-performance information, including performance trends, problems encountered, corrective actions, and the relationship between the work performed and the role proposed under this acquisition.

Substantial Confidence	Based on the Offeror's recent and relevant performance record, the Government has a high expectation that the Offeror will successfully perform the required effort. The record demonstrates consistently successful performance on work of sufficient relevance, scope, magnitude, and complexity to provide a high degree of
-------------------------------	--

	confidence in successful performance of this requirement.
Satisfactory Confidence	Based on the Offeror's recent and relevant performance record, the Government has a reasonable expectation that the Offeror will successfully perform the required effort. The record demonstrates generally successful performance but does not provide the same degree of relevant, consistently strong performance evidence necessary to support a high expectation of successful performance.
Neutral Confidence	No recent and relevant performance record is available, or the available record is too limited to support a meaningful confidence assessment. Neutral Confidence is neither favorable nor unfavorable.
Limited Confidence	Based on the Offeror's recent and relevant performance record, the Government has a low expectation that the Offeror will successfully perform the required effort. The record contains performance problems, adverse trends, or other information that raises meaningful concern regarding successful performance of this requirement.
No Confidence	Based on the Offeror's recent and relevant performance record, the Government has no expectation that the Offeror will successfully perform the required effort. The record demonstrates serious or recurring performance problems that materially undermine confidence in successful performance.

M.8 BEST-VALUE DECISION

The Source Selection Authority will compare the evaluated technical merit and performance risk, past-performance confidence, and evaluated price of competing proposals and determine which proposal provides the best value to the Government.

The best-value decision will not be based on:

- A mechanical application of adjectival ratings;
- Numerical point scoring; or

- A mathematical formula.

The Government may select a higher-priced proposal when the Source Selection Authority determines that the proposal's superior technical merit, lower performance risk, and/or greater past-performance confidence warrants the associated price premium.

The Government may select a lower-priced proposal when the Source Selection Authority determines that the additional merit or lower risk of a higher-priced proposal does not warrant the associated price premium.

The solicitation's evaluated quantities do not constitute a promise that the Government will order those quantities.

The contract minimum is one trailer. The currently anticipated maximum quantity is thirteen trailers, including the production-representative first article, subject to the contract ceiling and the terms of the resulting IDIQ contract.

The solicitation's evaluated quantities do not constitute a promise that the Government will order those quantities. The guaranteed minimum under the resulting IDIQ contract is \$5,000.00 for Contract Kickoff and Initial Program Planning under CLIN 0001. The maximum vehicle quantity is thirteen MCPV trailers, including one potential production-representative First Article, and thirteen Prime Hauler Vehicles, subject to the contract ceiling and the terms of the resulting IDIQ contract. The Government is not obligated beyond the guaranteed minimum and the value of funded delivery orders issued under the contract.
